

### Adda river

Model with a single change point

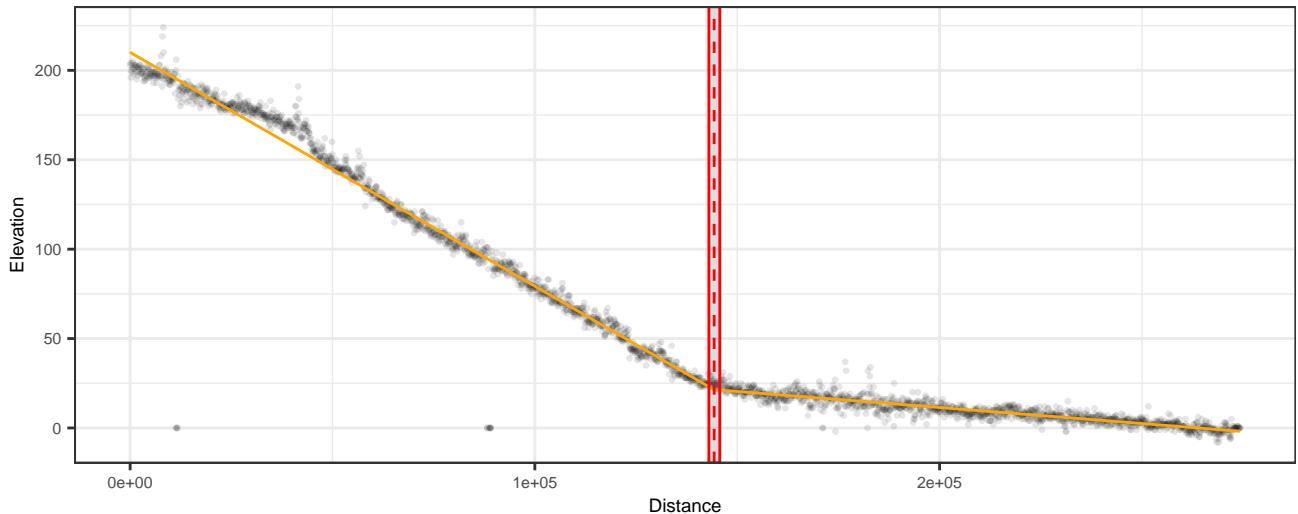

Model with two changepoints

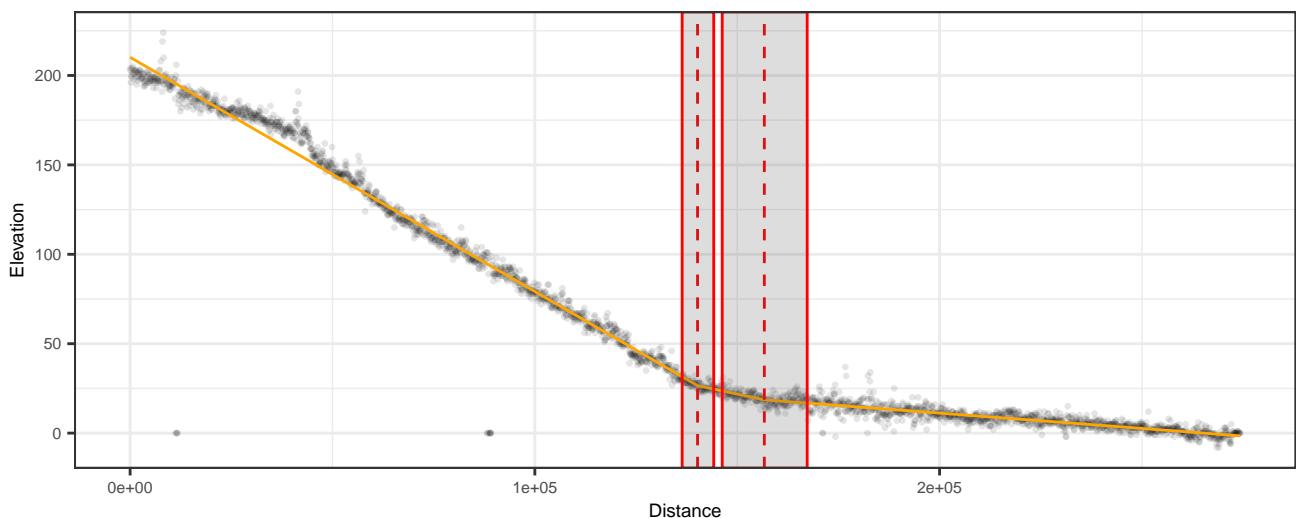

Information    + Confluence    - Estimated CP    | Linear model

### Adige river

Model with a single change point

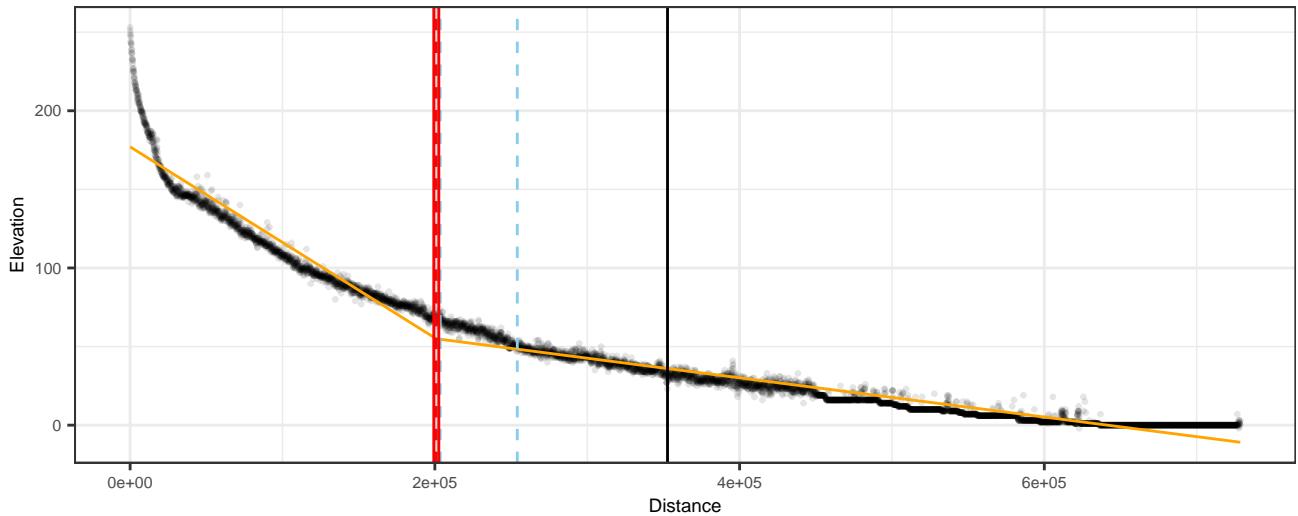

Model with two changepoints

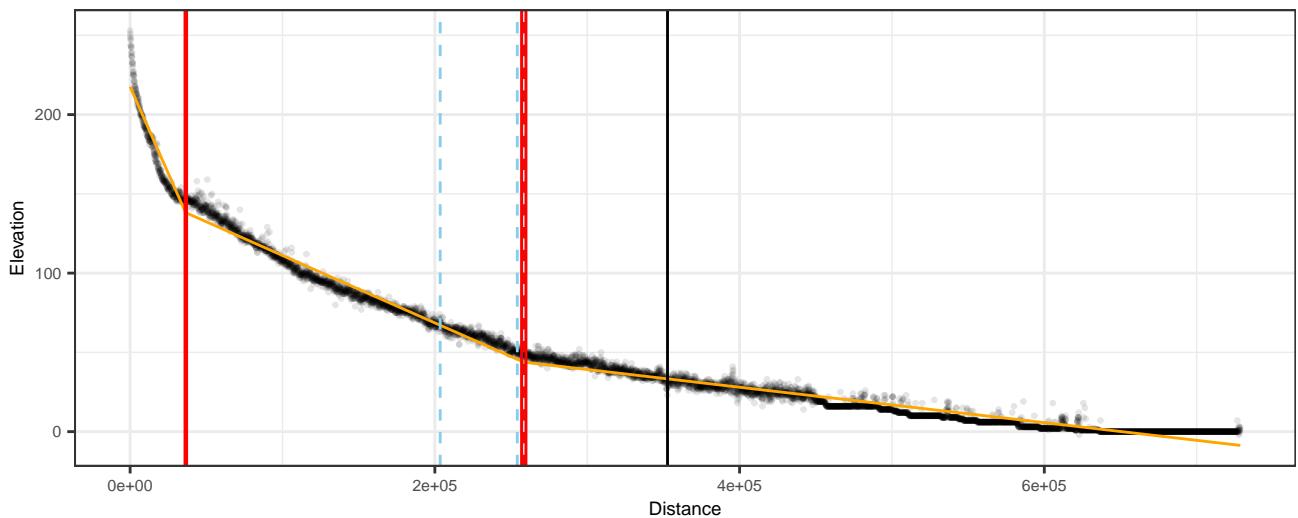

Information — Estimated CP — Linear model

Aisne river

Model with a single change point

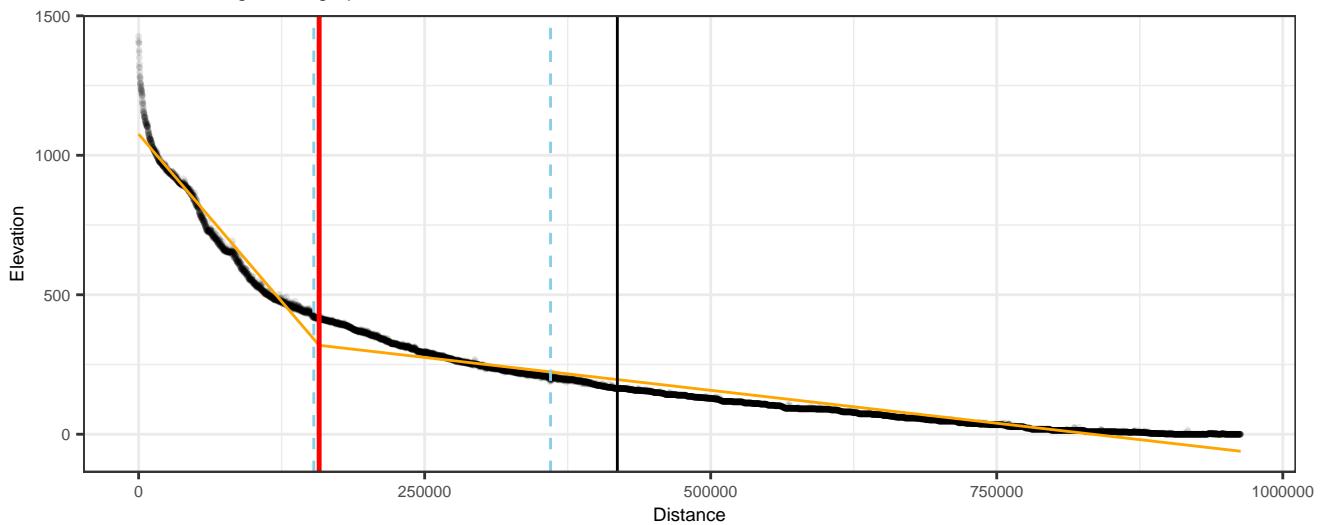

Model with two changepoints

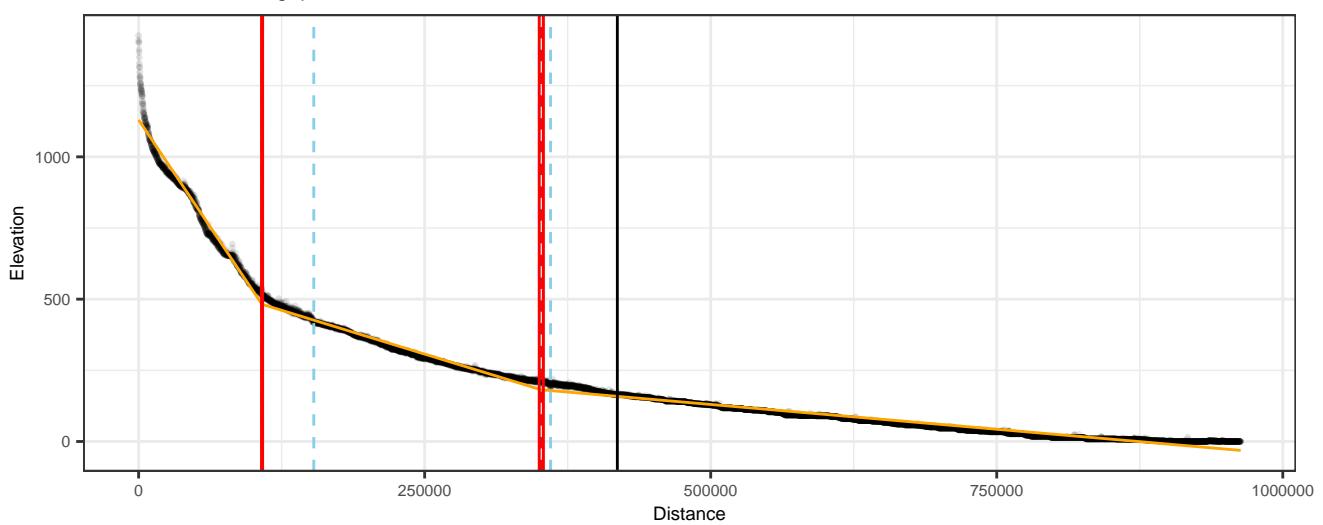

Information    + Empirical CP    - Confluence    - Estimated CP    + Linear model

### Allier river

Model with a single change point

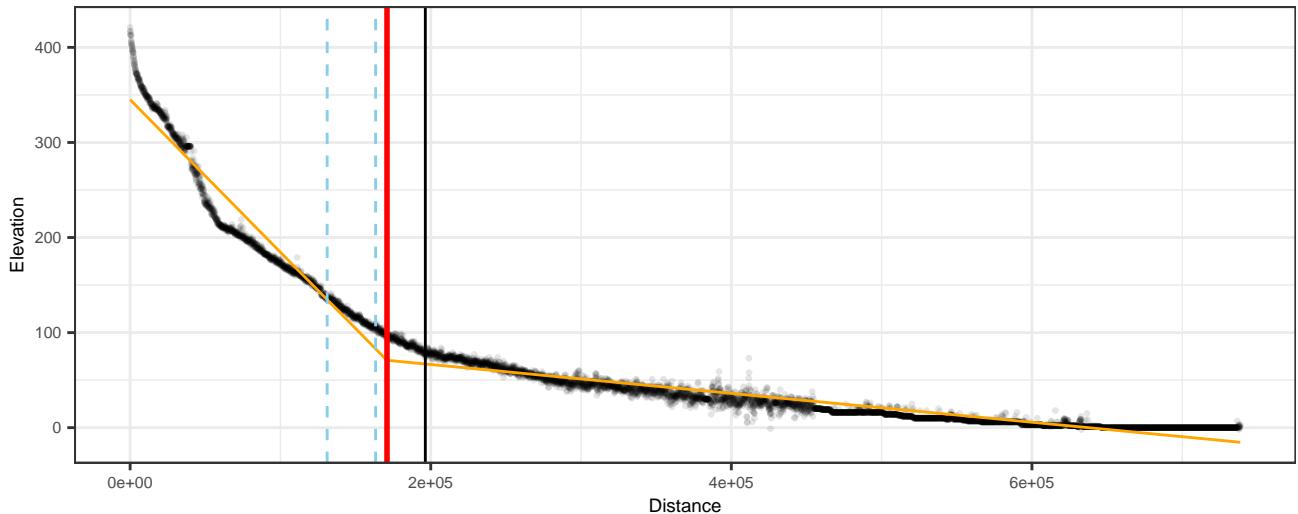

Model with two changepoints

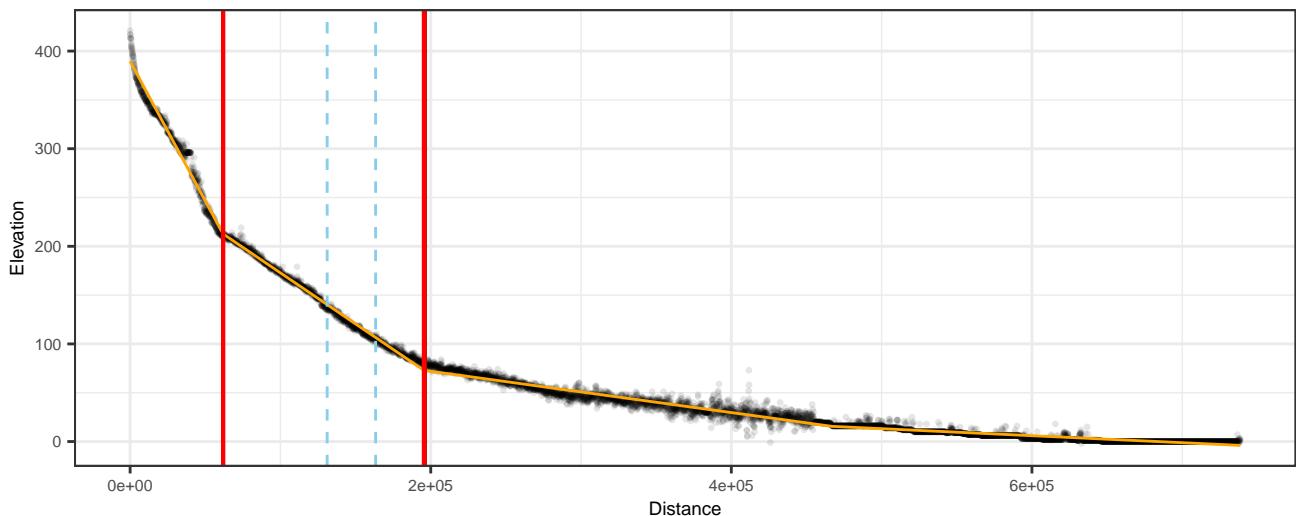

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

### Armançon river

Model with a single change point

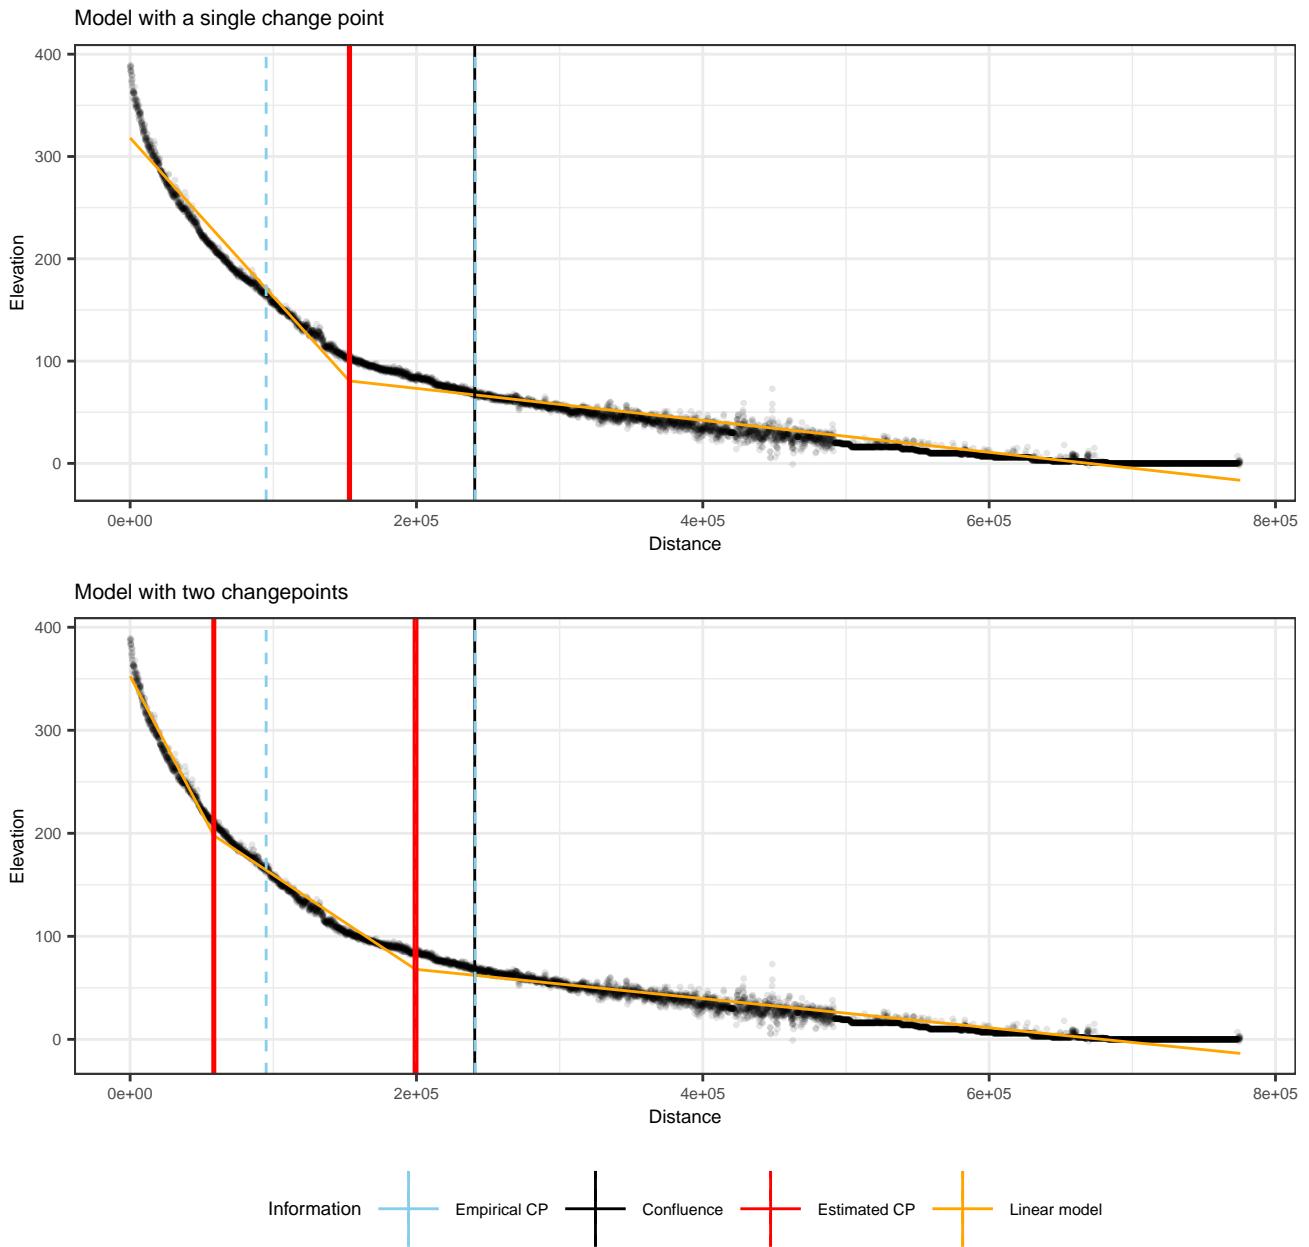

Model with two changepoints

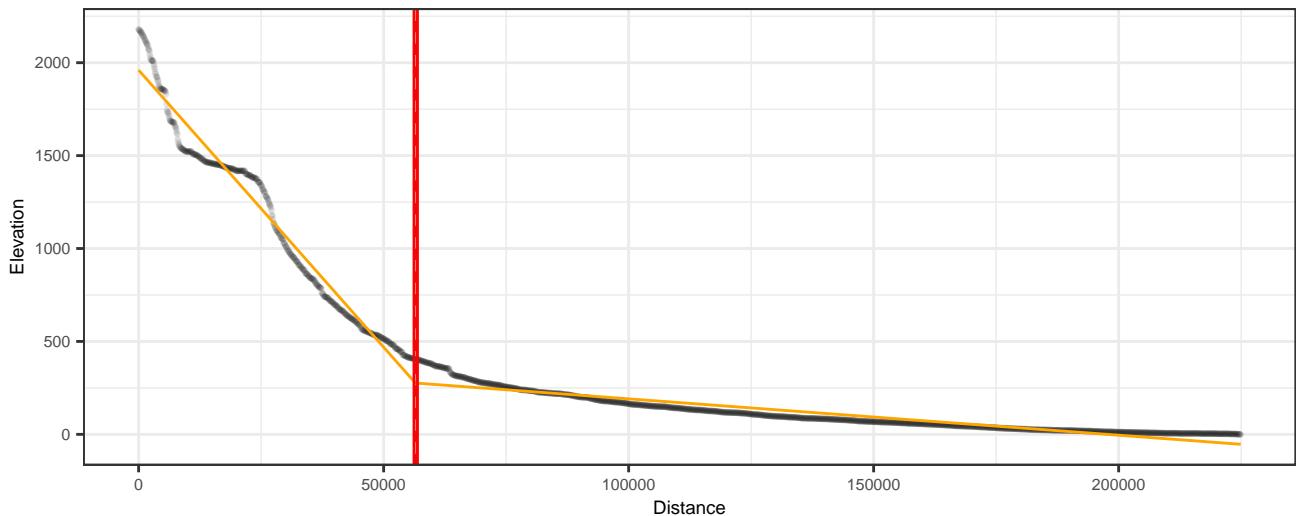

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

### Aube river

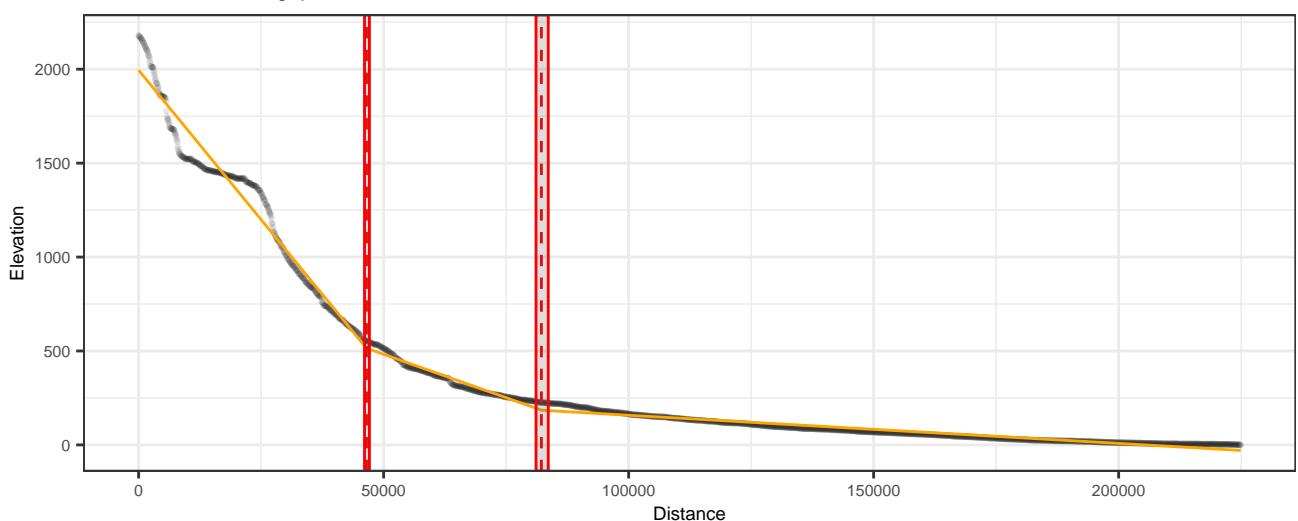

### Aude river

Model with a single change point

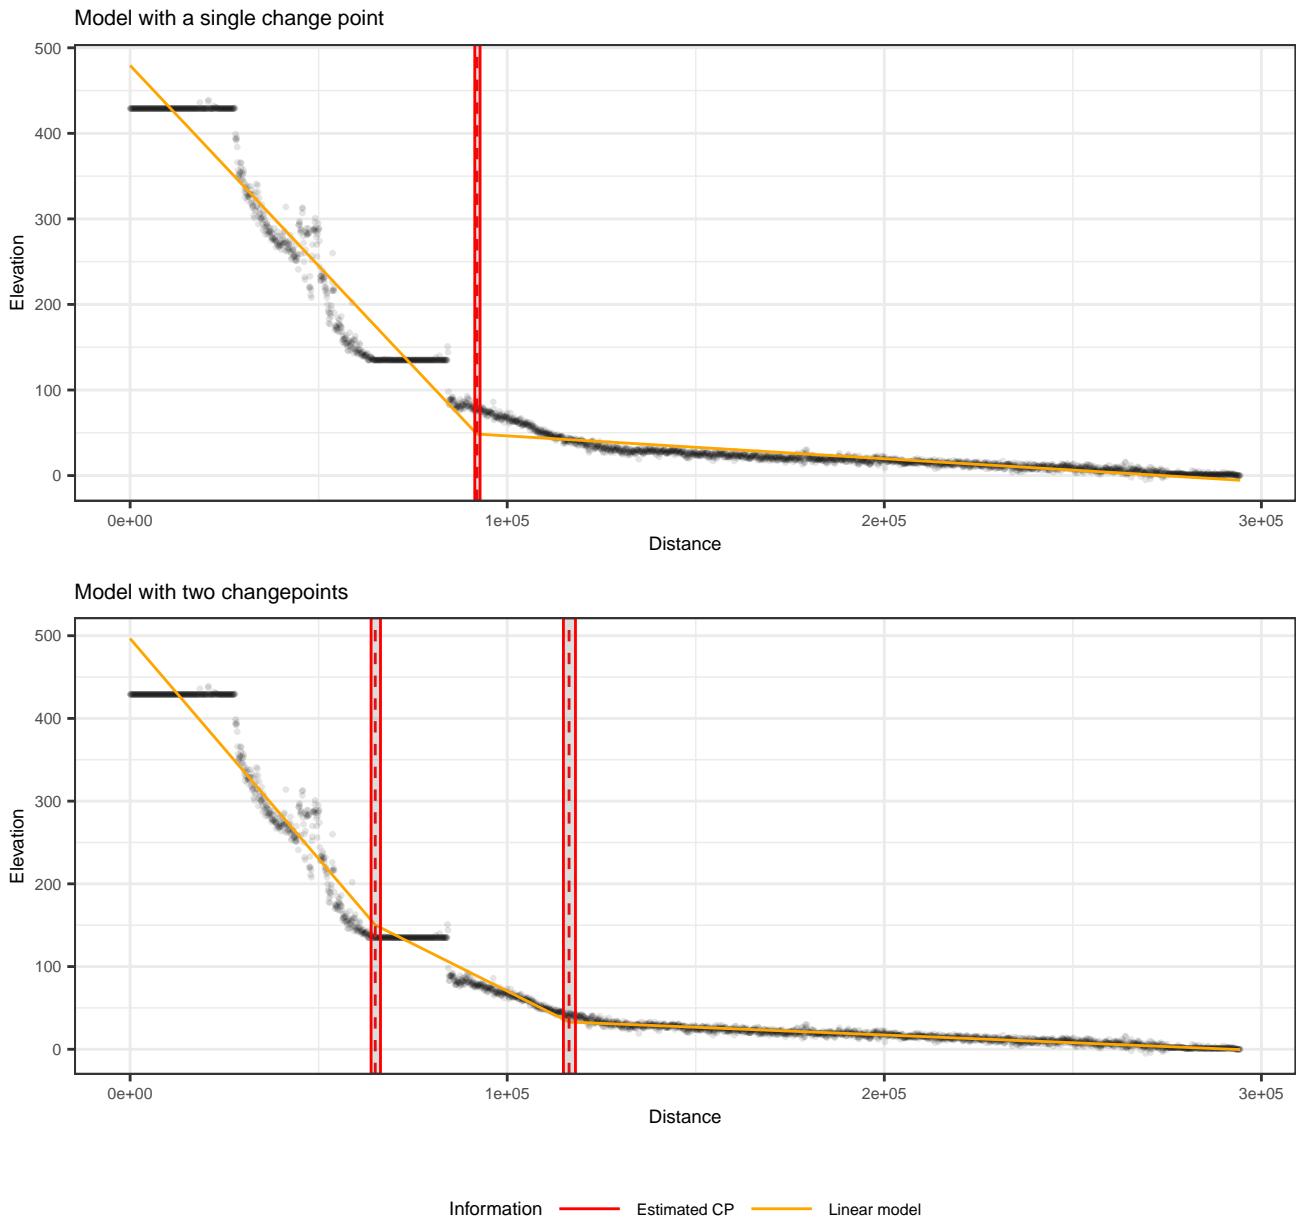

Model with two changepoints

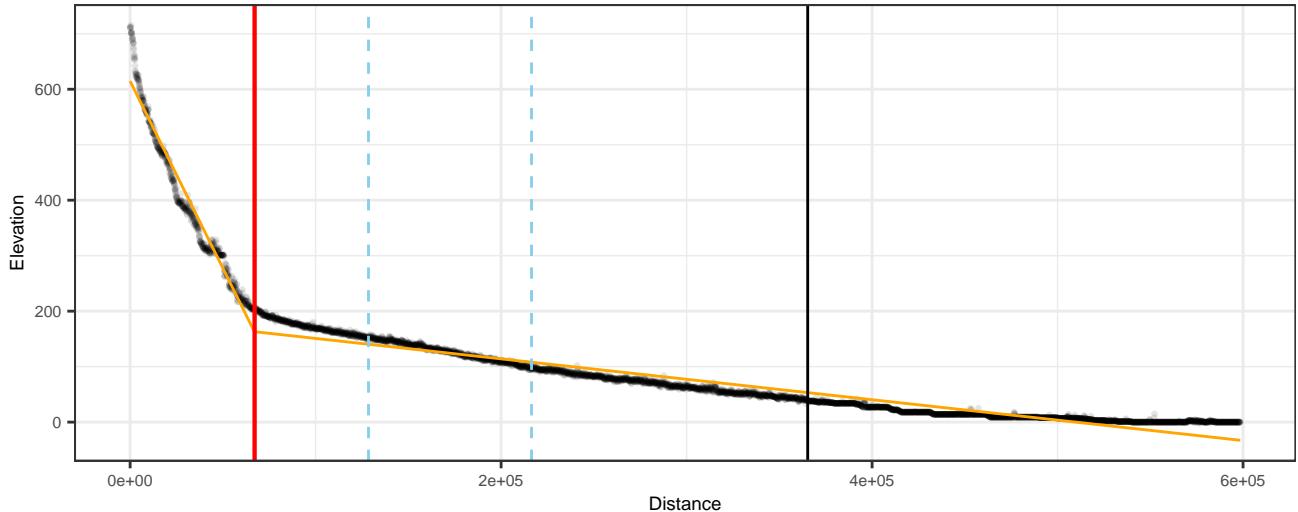

Information — Estimated CP — Linear model

Ceyhan river

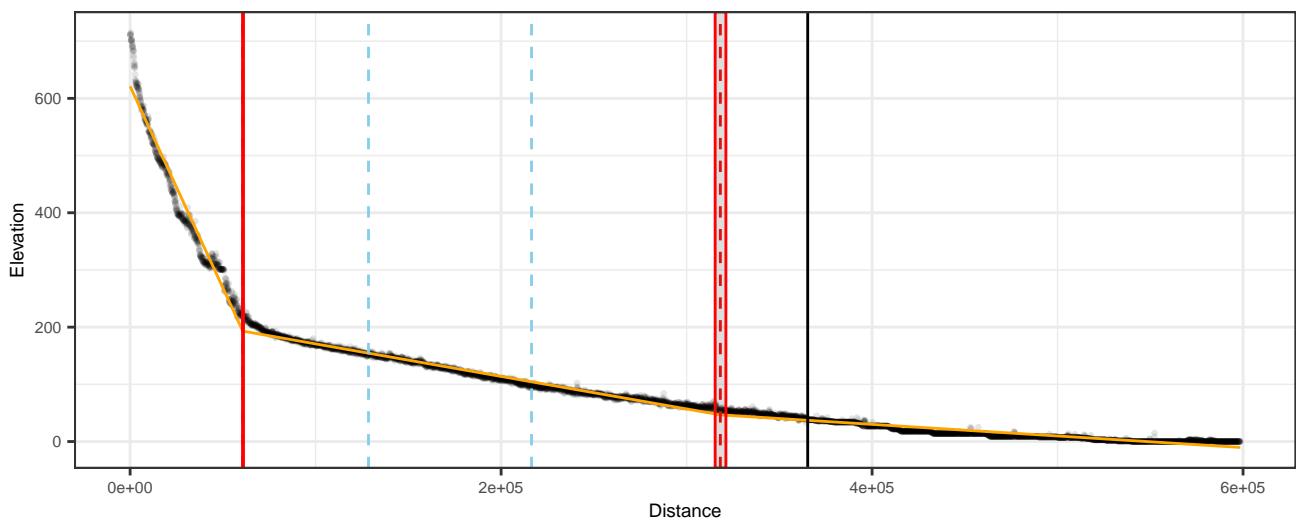

### Cher river

Model with a single change point

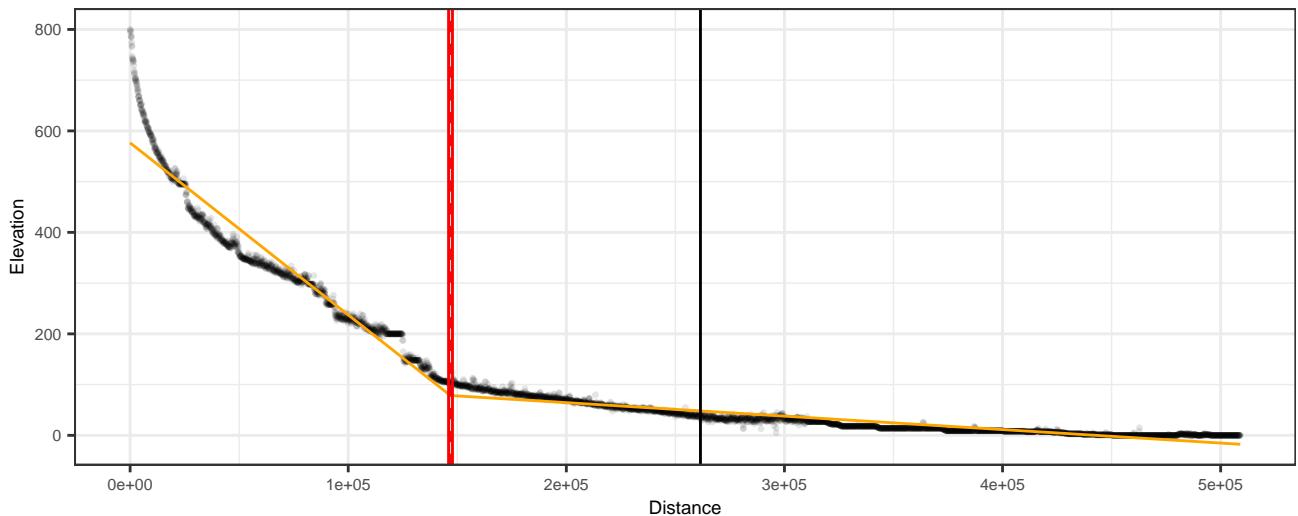

Model with two changepoints

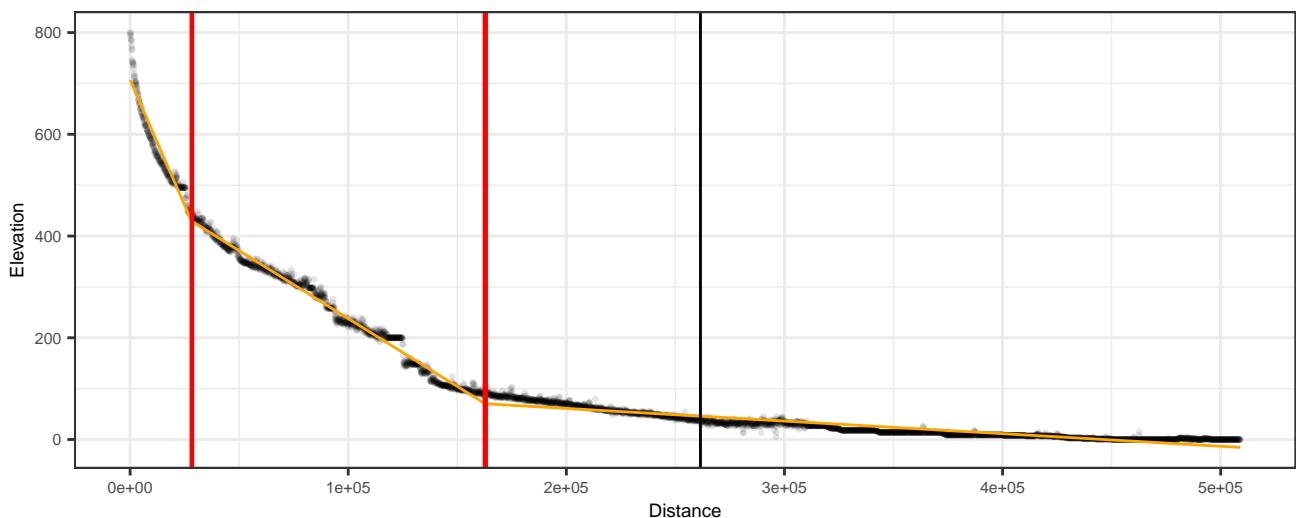

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

### Creuse river

Model with a single change point

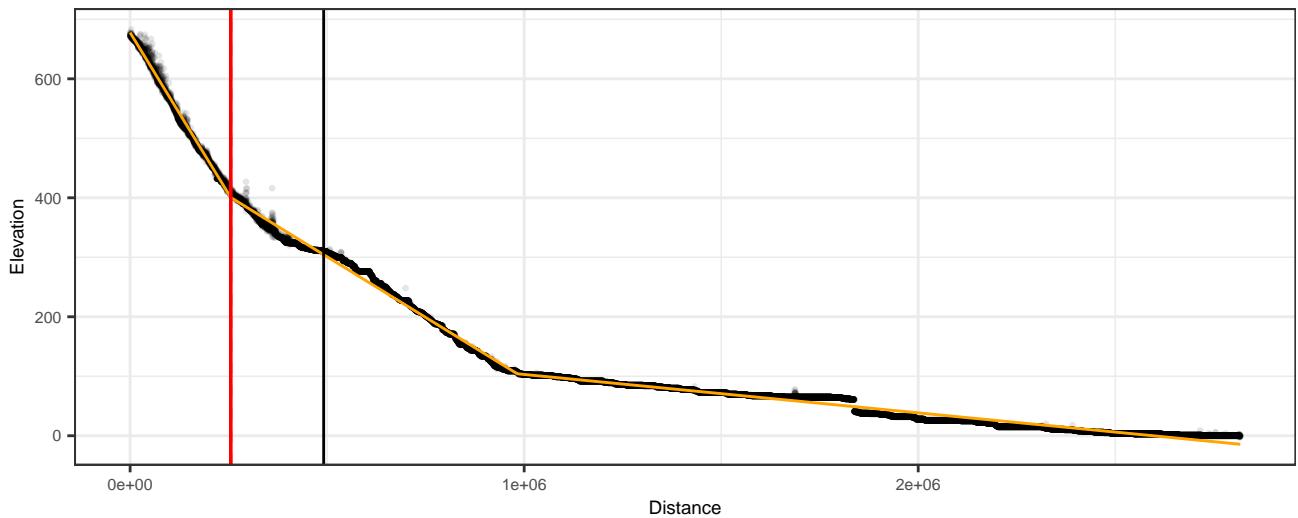

Model with two changepoints

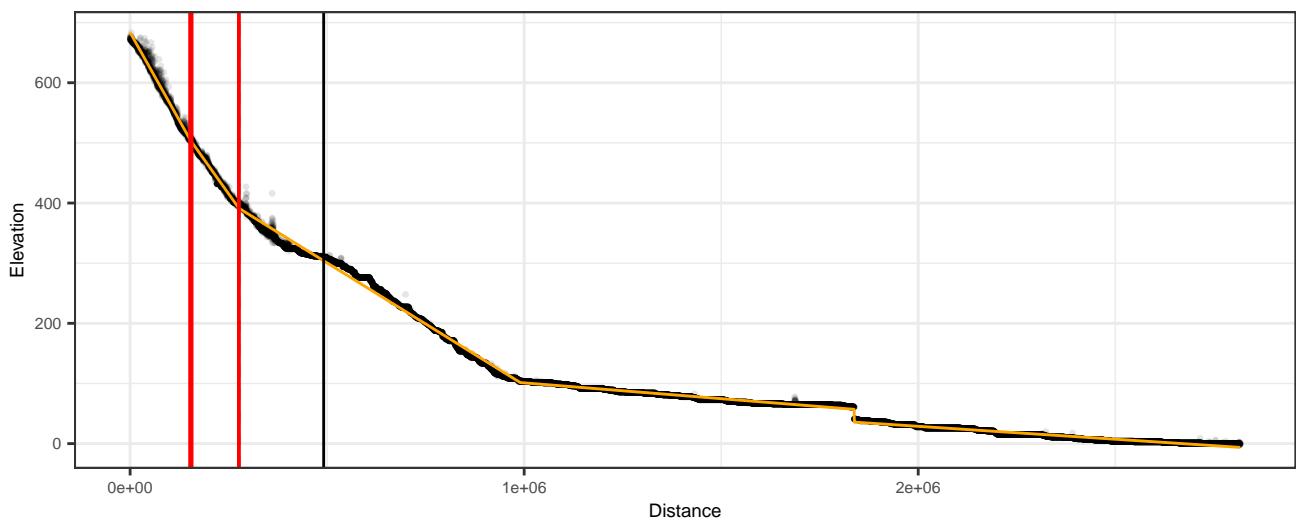

Information		Confluence		Estimated CP		Linear model
-------------	--	------------	--	--------------	--	--------------

### Danube river

Model with a single change point

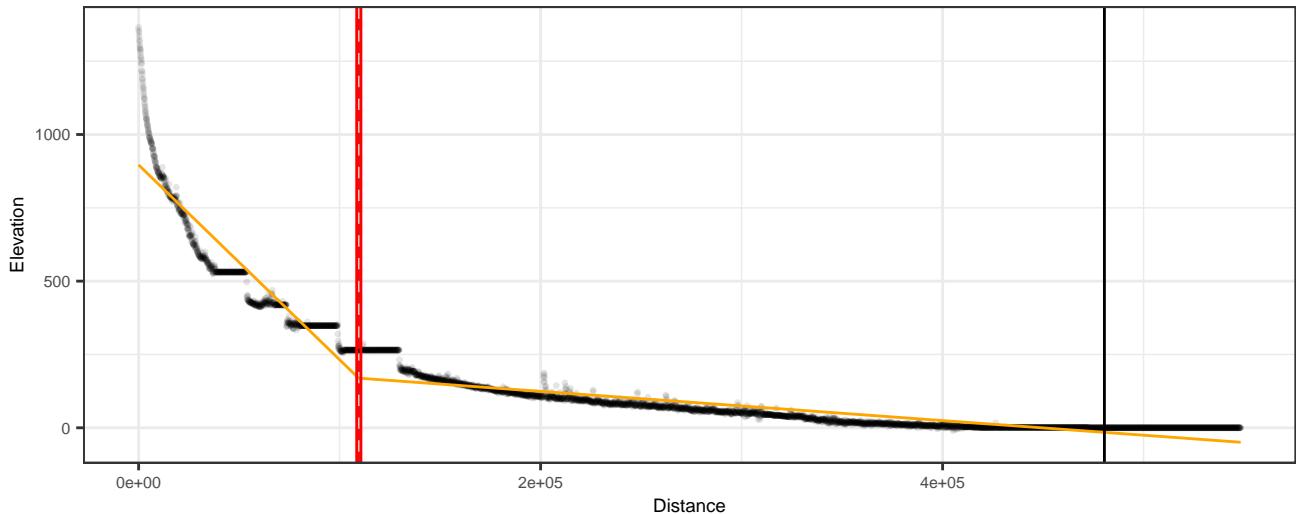

Model with two changepoints

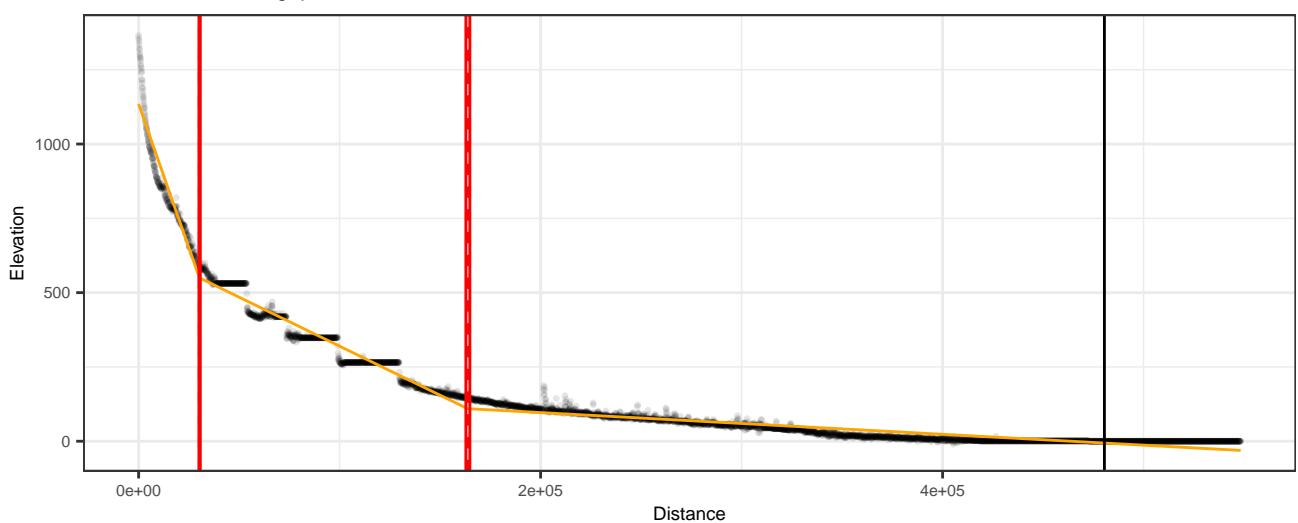

Information    +    Confluence    -    Estimated CP    —    Linear model

### Dordogne river

Model with a single change point

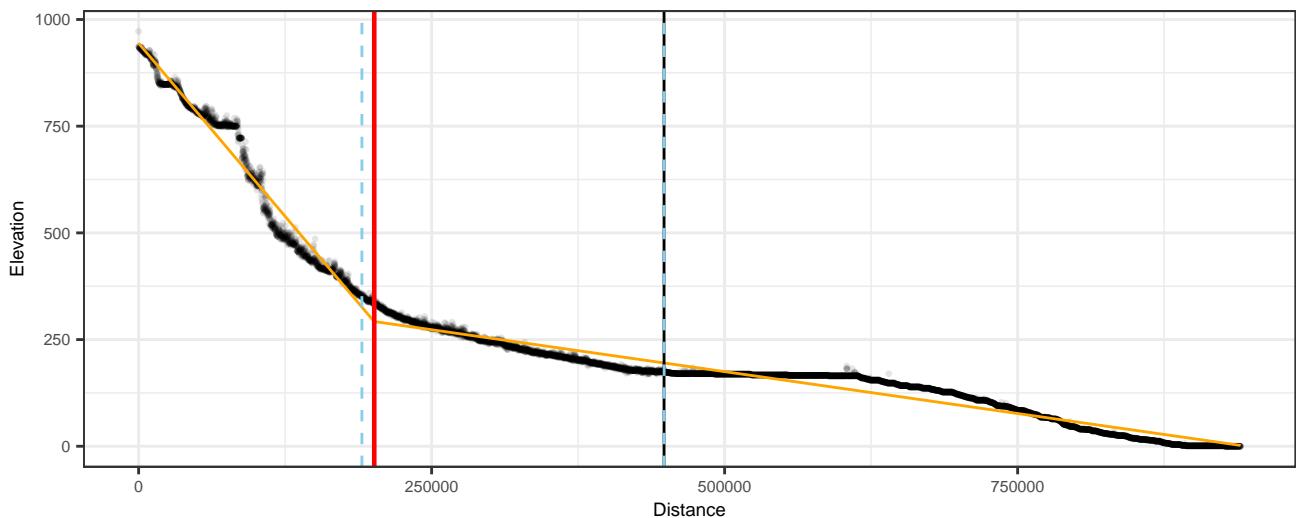

Model with two changepoints

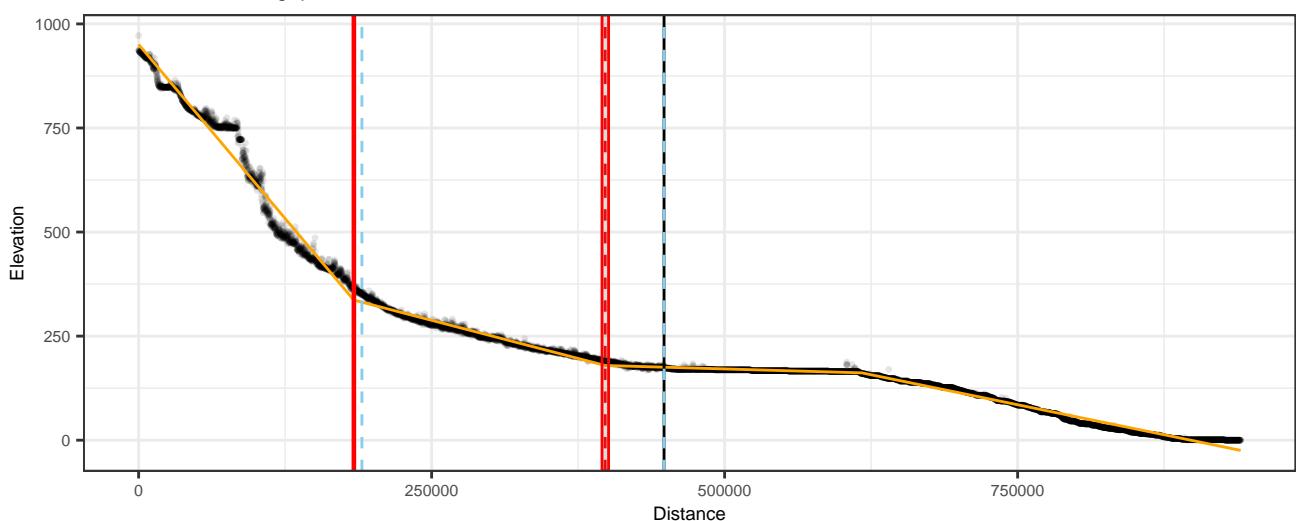

Information    + Confluence    - Estimated CP    | Linear model

### Doubs river

Model with a single change point

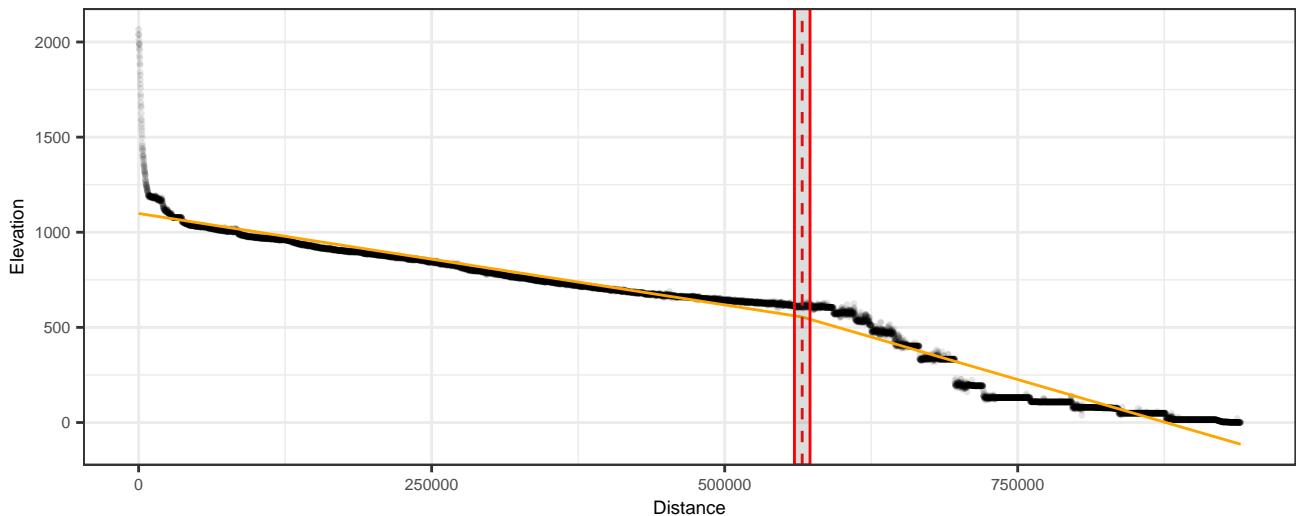

Model with two changepoints

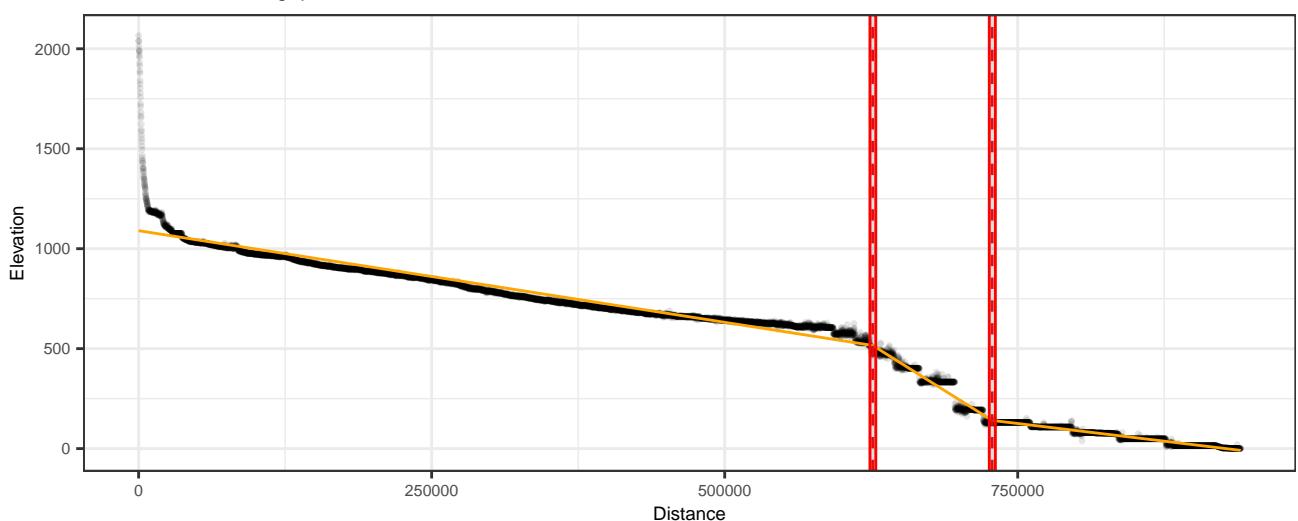

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

### Duero river

Model with a single change point

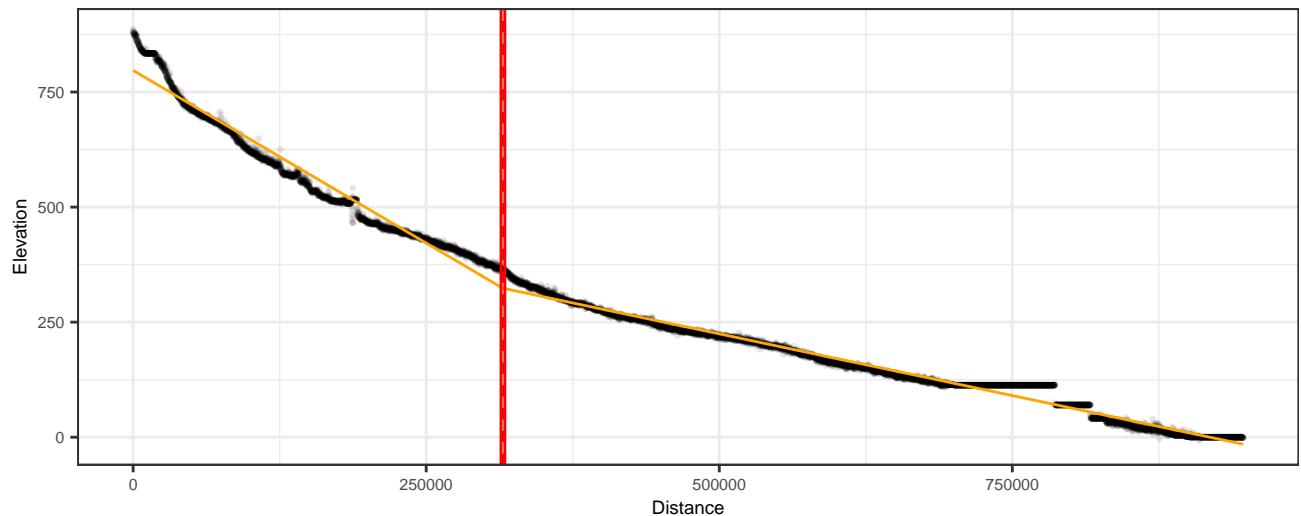

Model with two changepoints

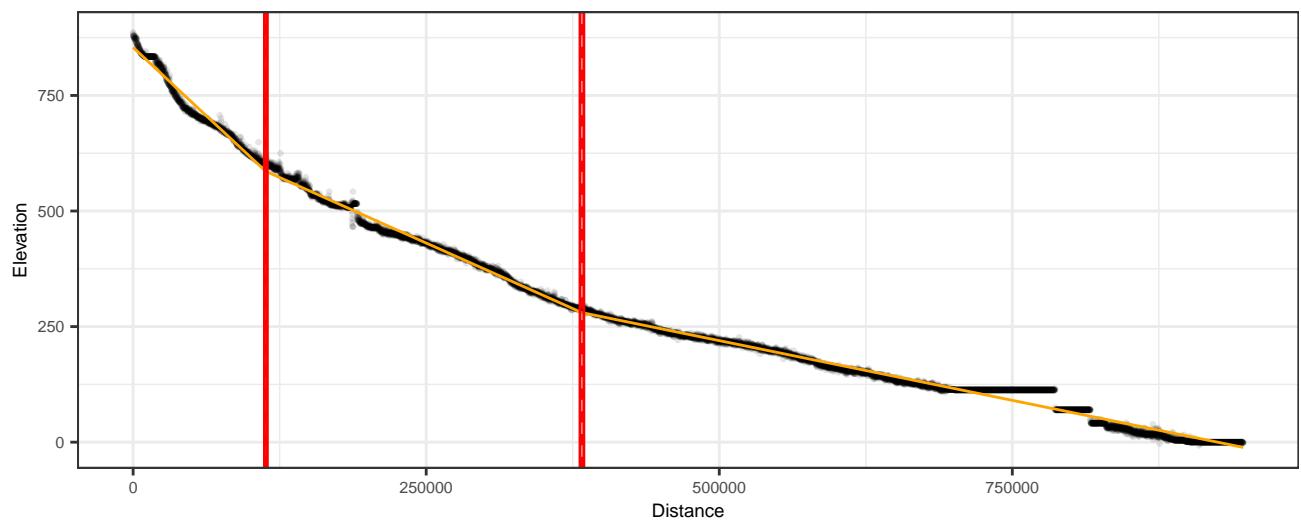

Information — Estimated CP — Linear model

### Ebro river

Model with a single change point

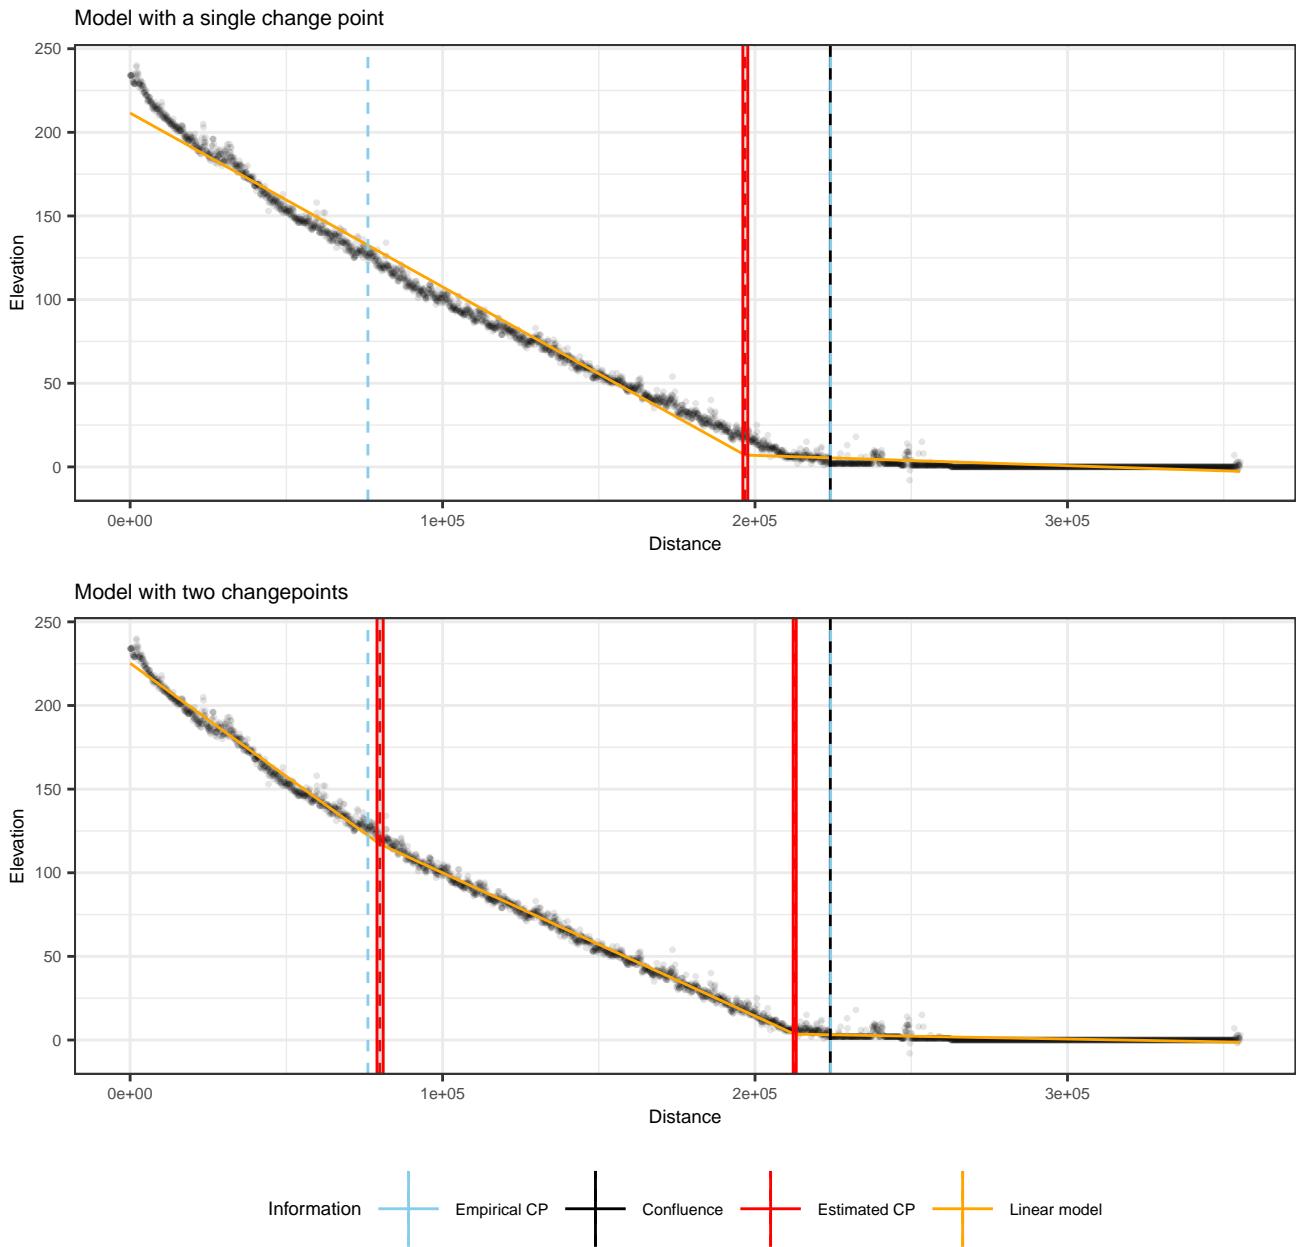

Model with two changepoints

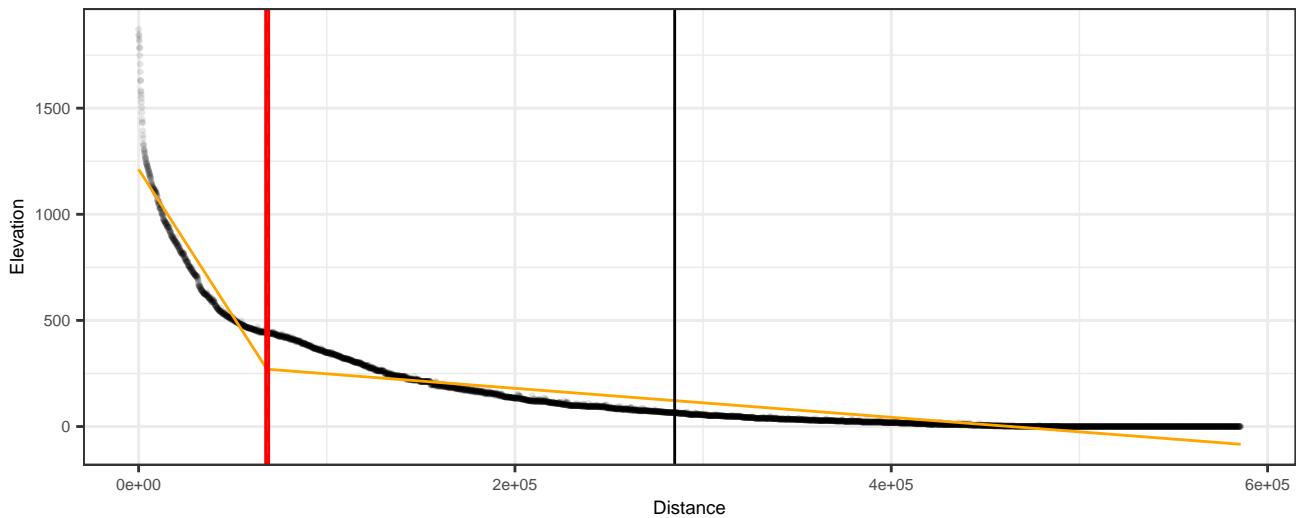

Information ————— Estimated CP ————— Linear model

### Eure river

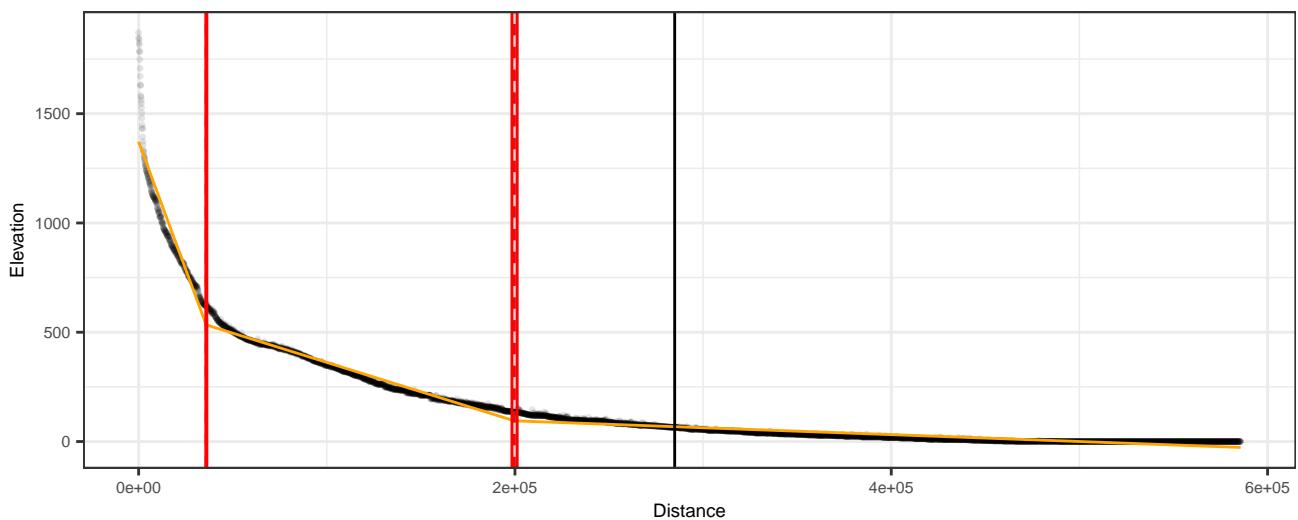

### Garonne river

Model with a single change point

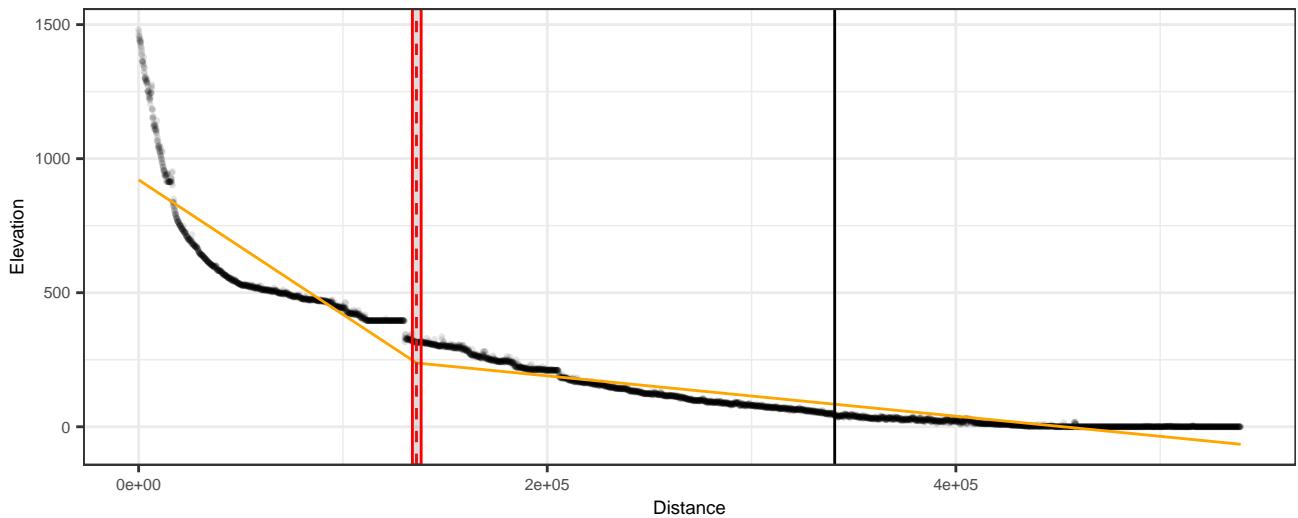

Model with two changepoints

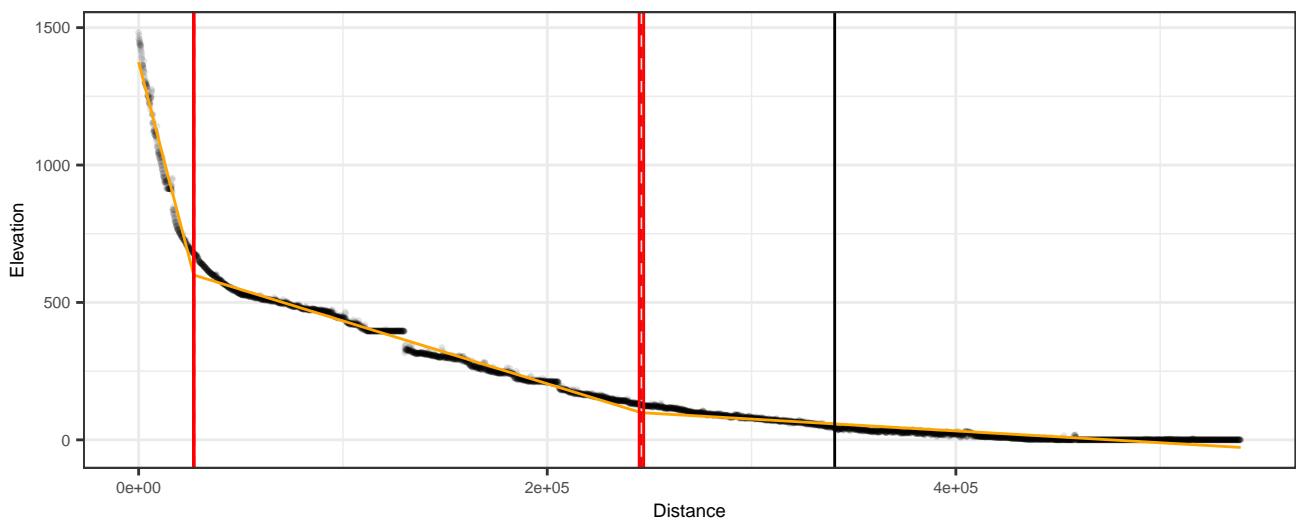

Information	+	Confluence	+	Estimated CP	+	Linear model
-------------	---	------------	---	--------------	---	--------------

### Genil river

Model with a single change point

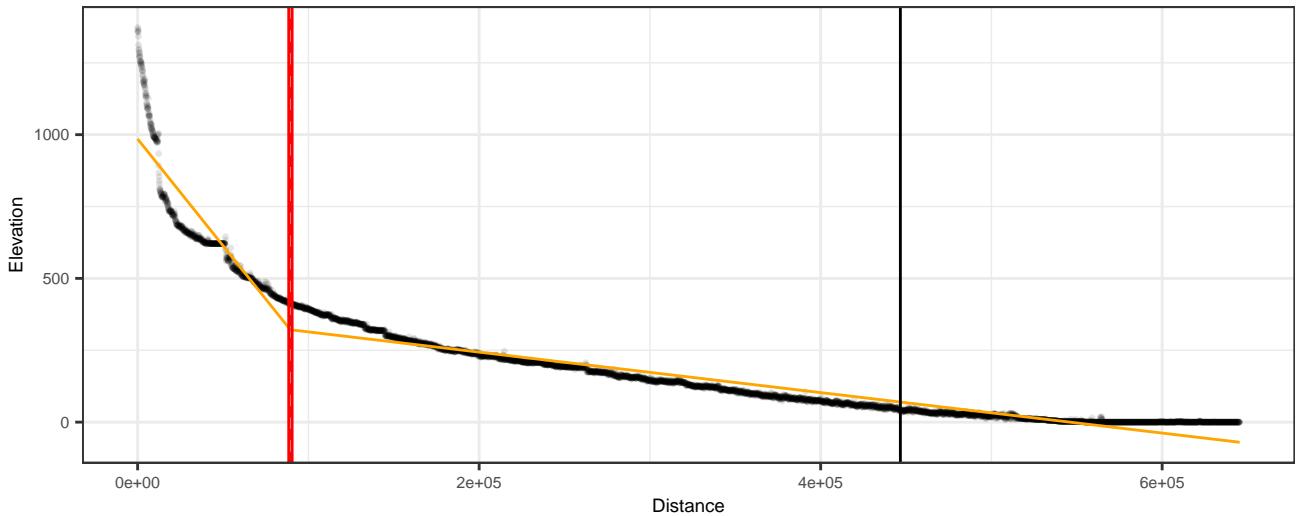

Model with two changepoints

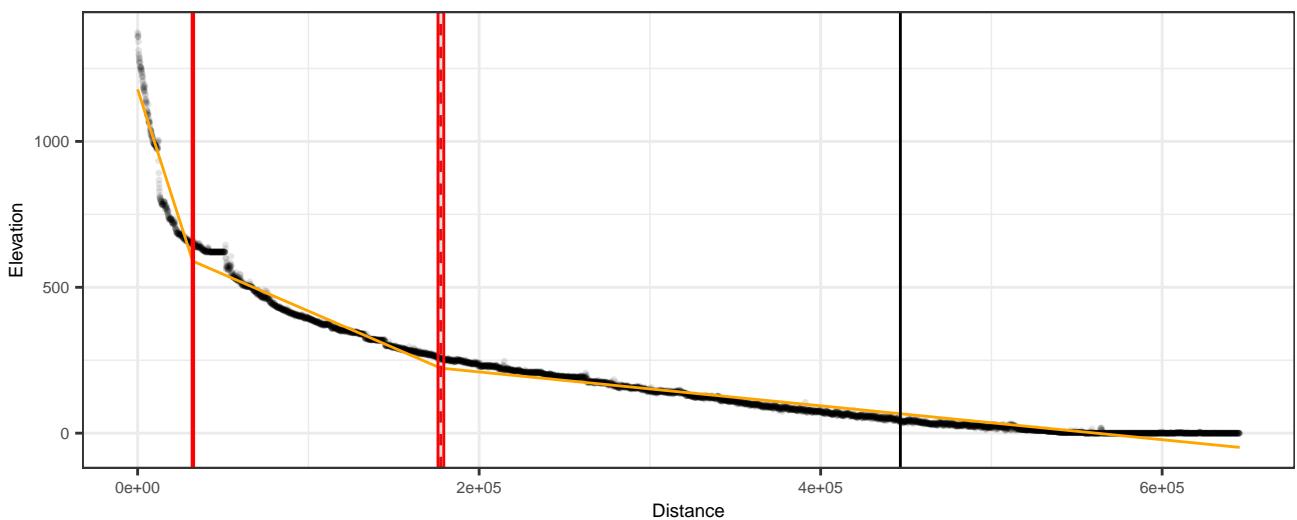

Information    + Confluence    - Estimated CP    | Linear model

### Guadalquivir river

Model with a single change point

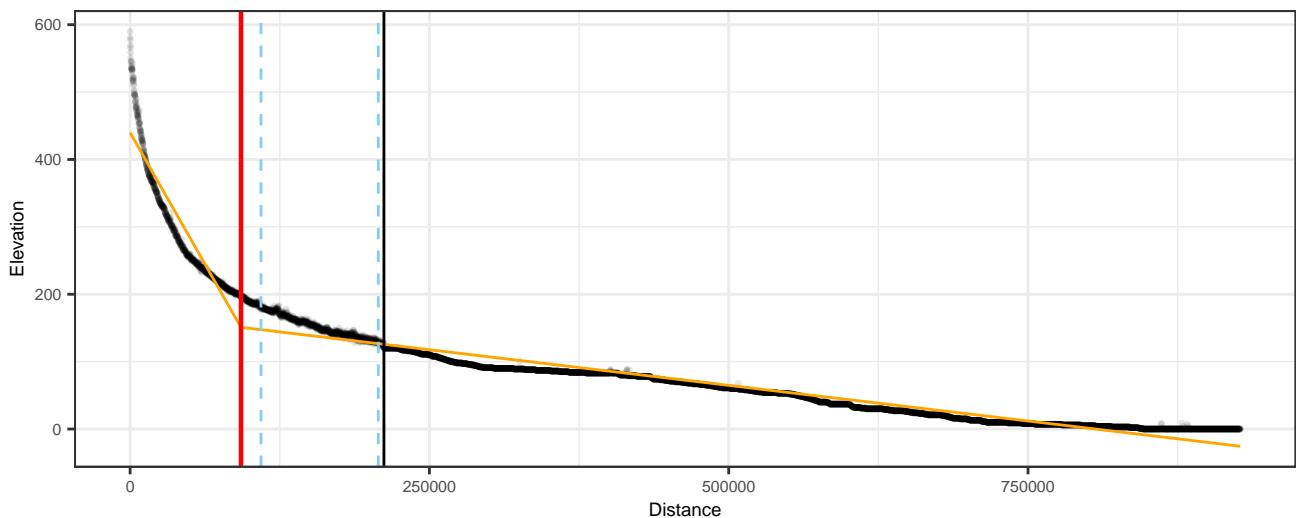

Model with two changepoints

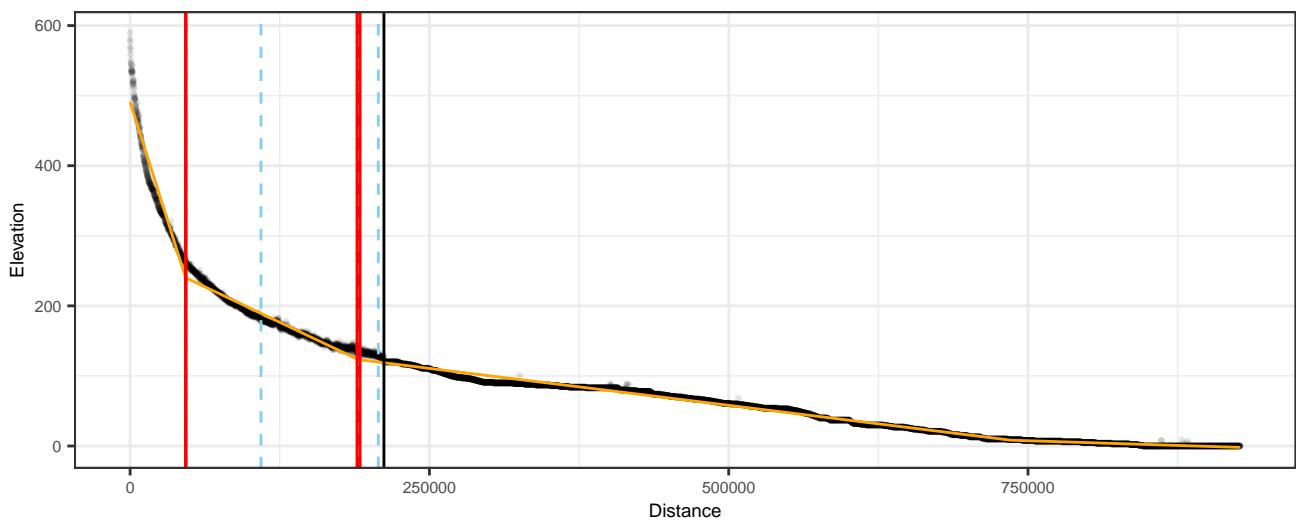

Information	+	Confluence	+	Estimated CP	+	Linear model
-------------	---	------------	---	--------------	---	--------------

### III river

Model with a single change point

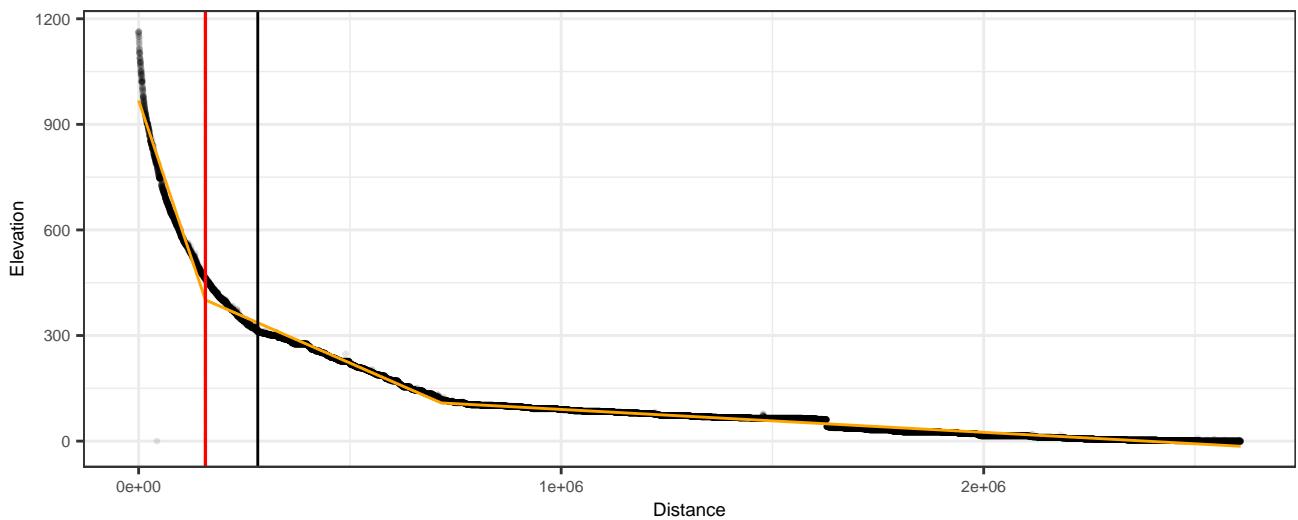

Model with two changepoints

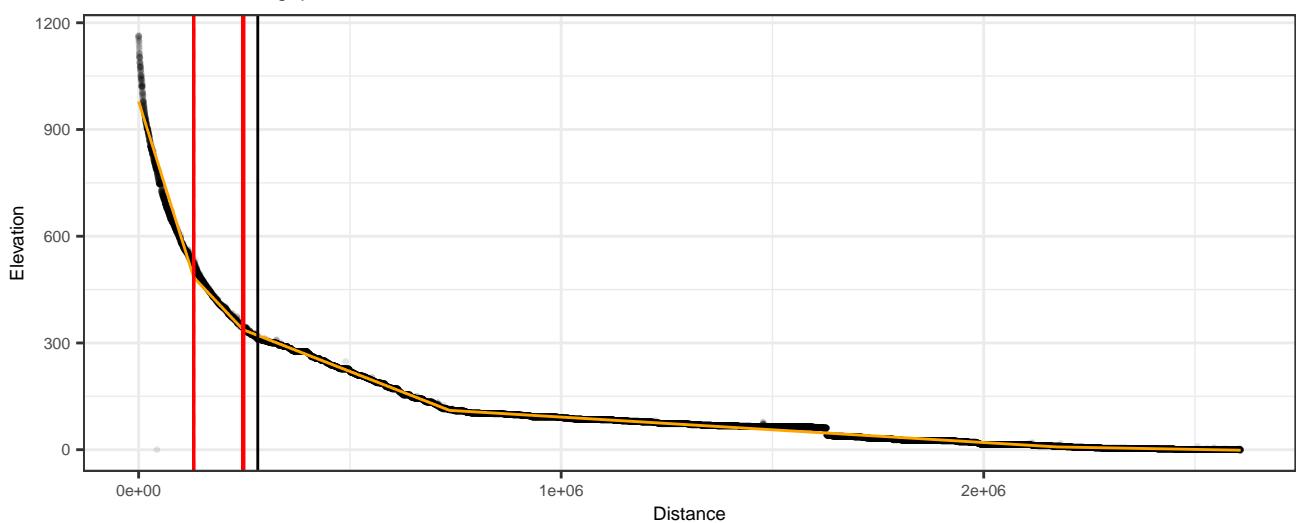

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

### Isar river

Model with a single change point

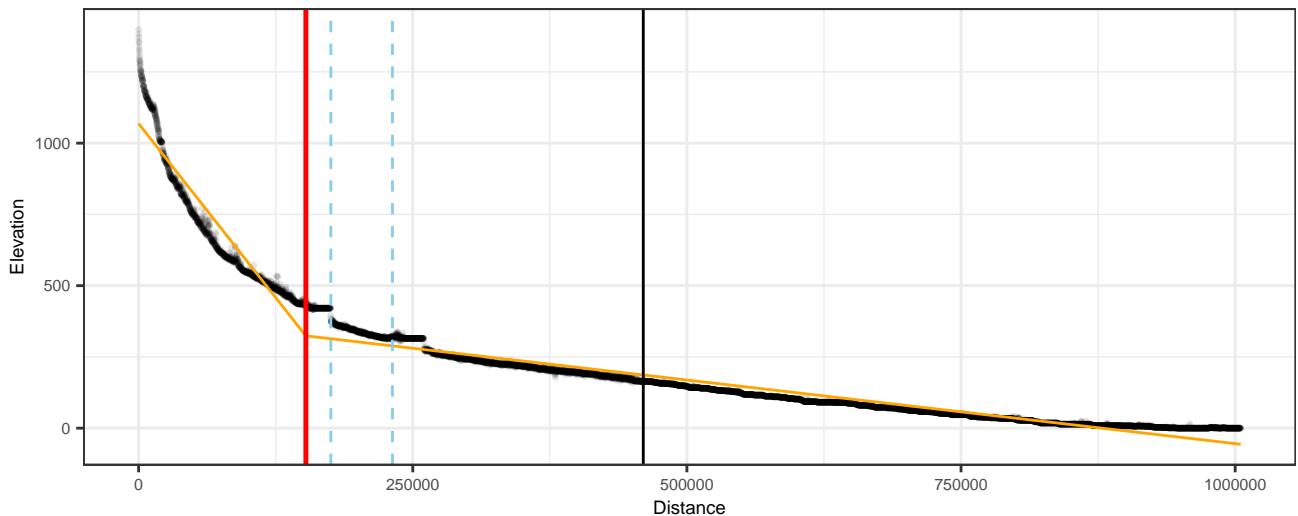

Model with two changepoints

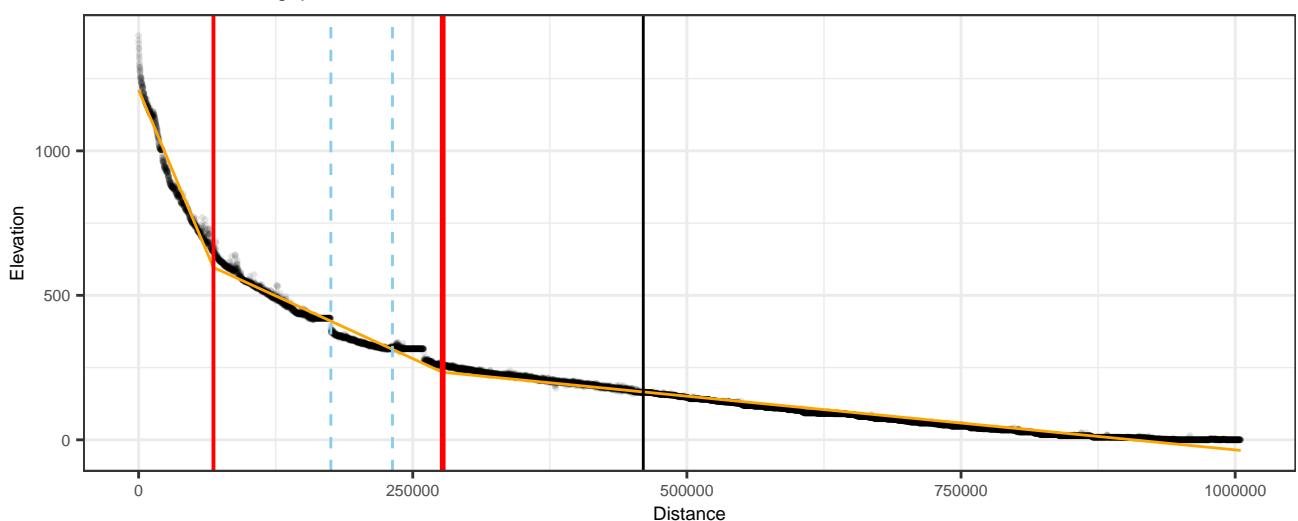

Information    +    Confluence    -    Estimated CP    |    Linear model

### Loire river

Model with a single change point

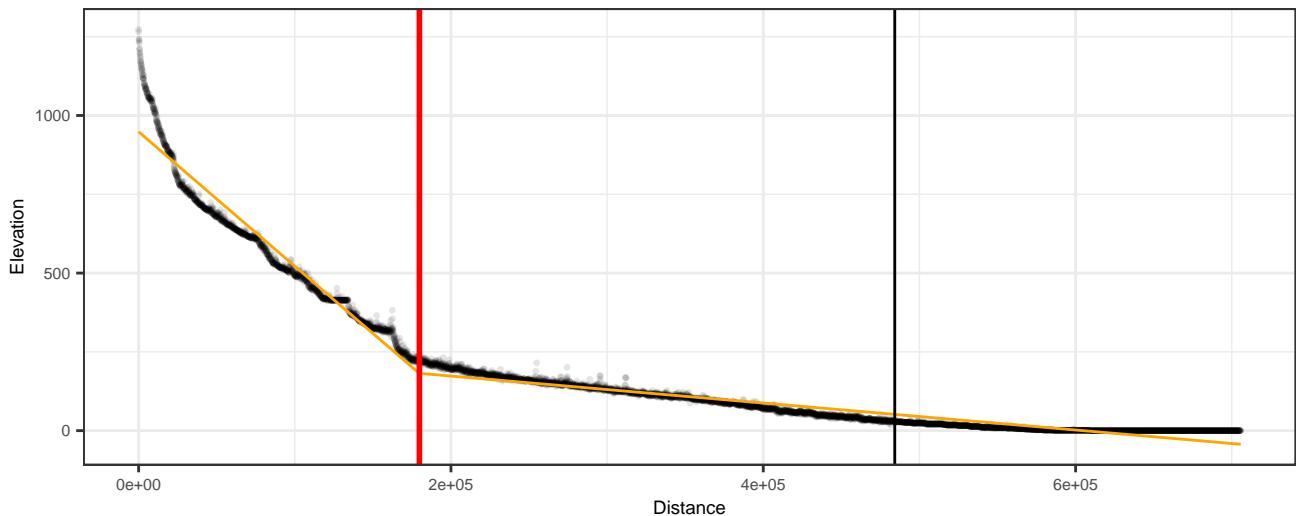

Model with two changepoints

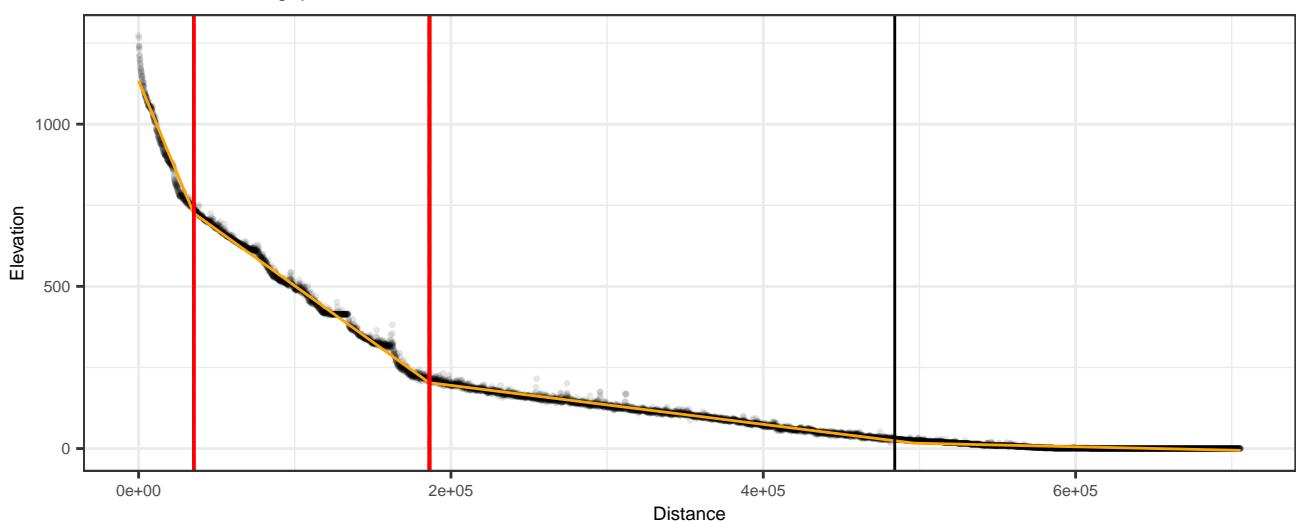

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

### Lot river

Model with a single change point

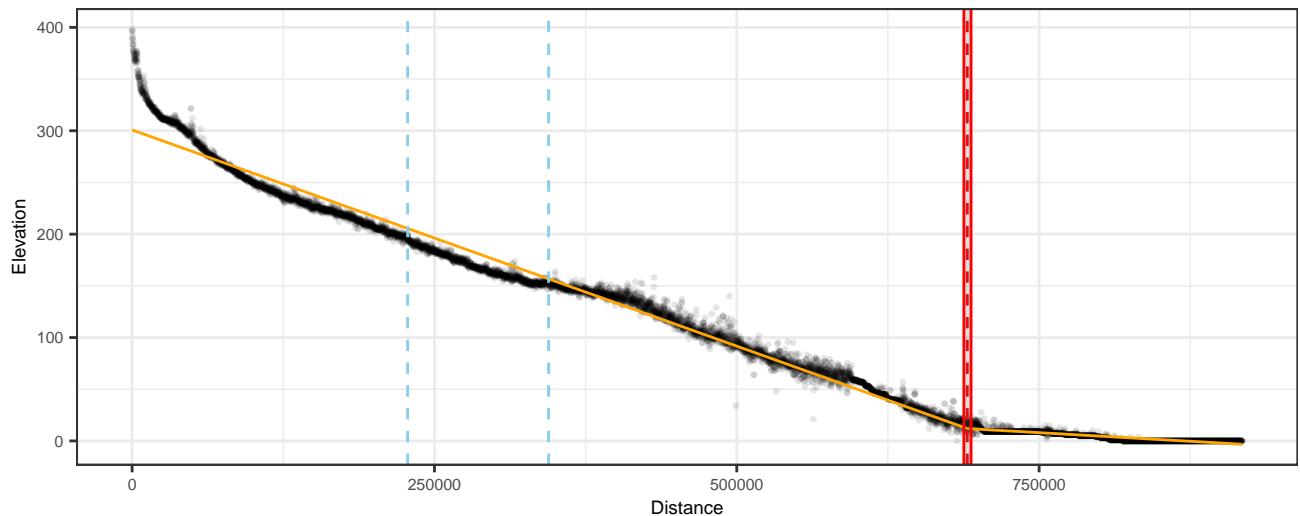

Model with two changepoints

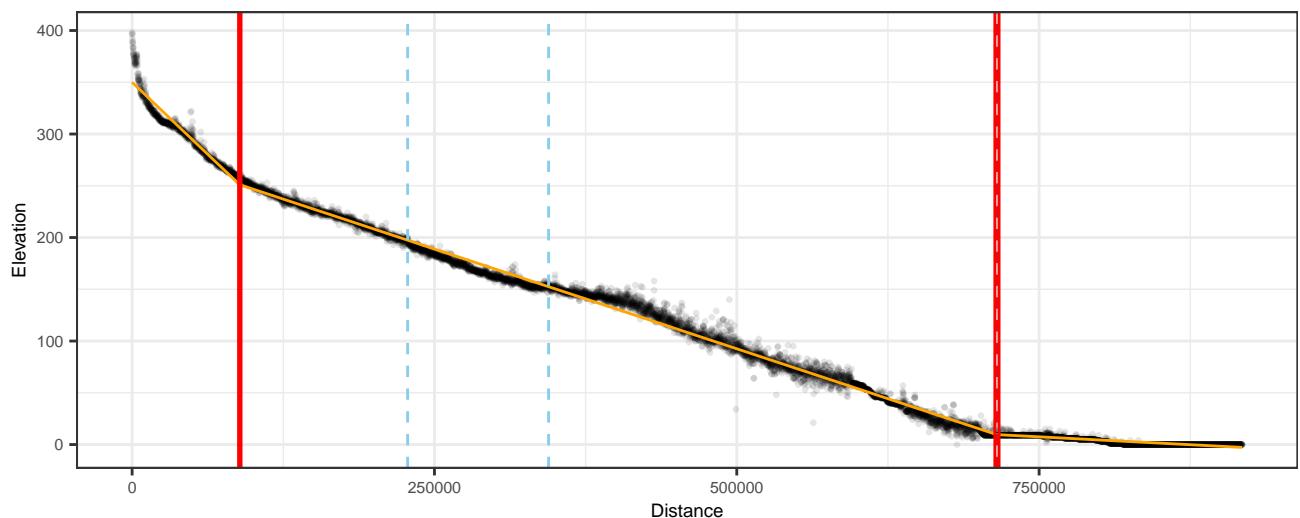

Information    +    Confluence    -    Estimated CP    |    Linear model

### Maas river

Model with a single change point

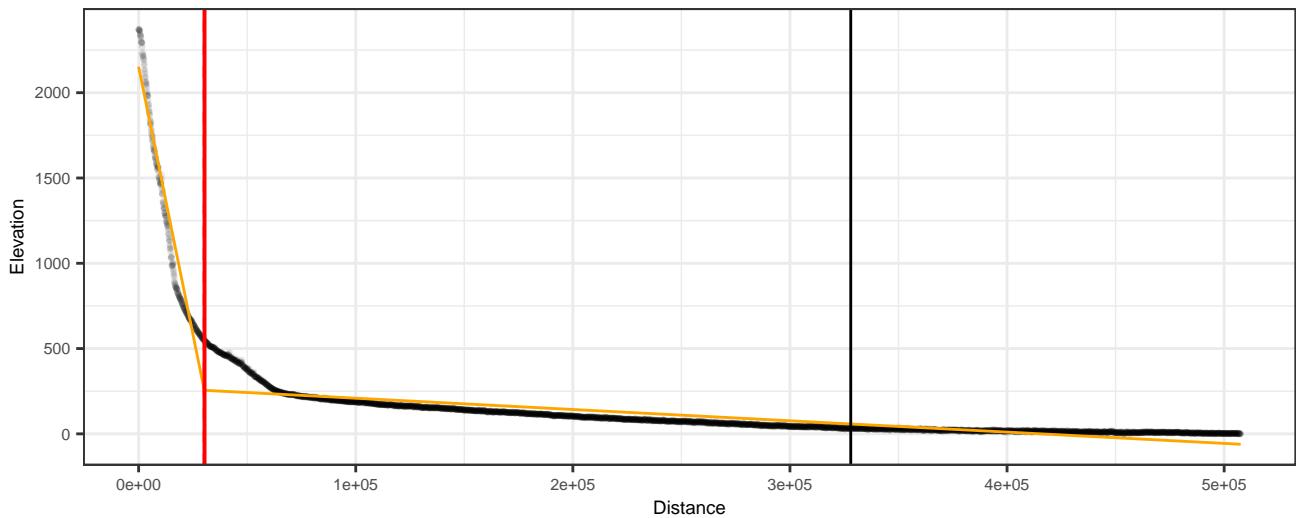

Model with two changepoints

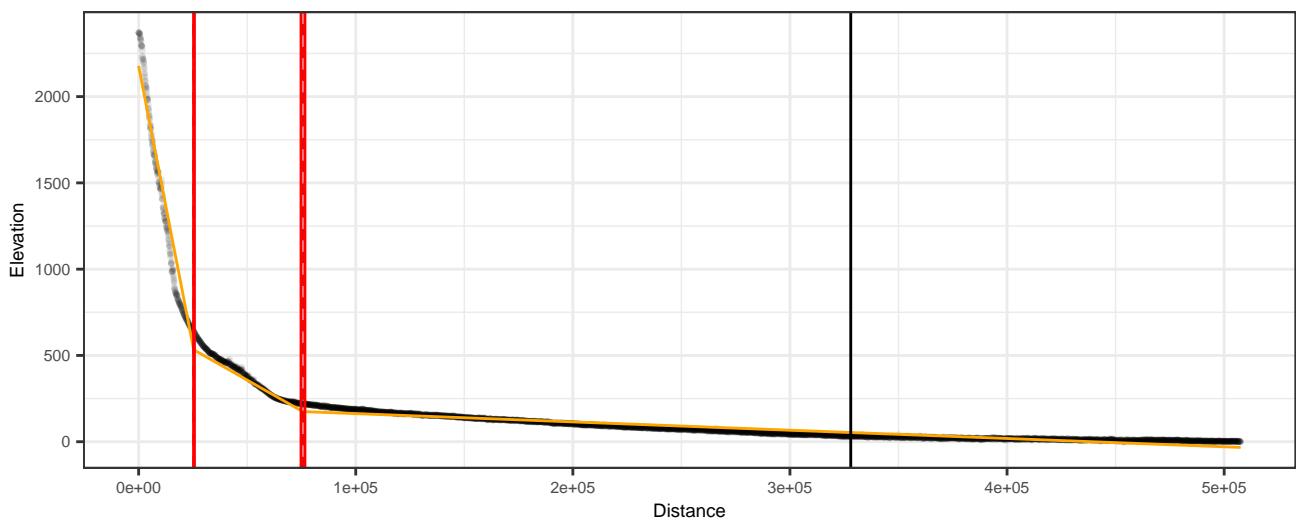

Information			

### Maritsa–Evros river

Model with a single change point

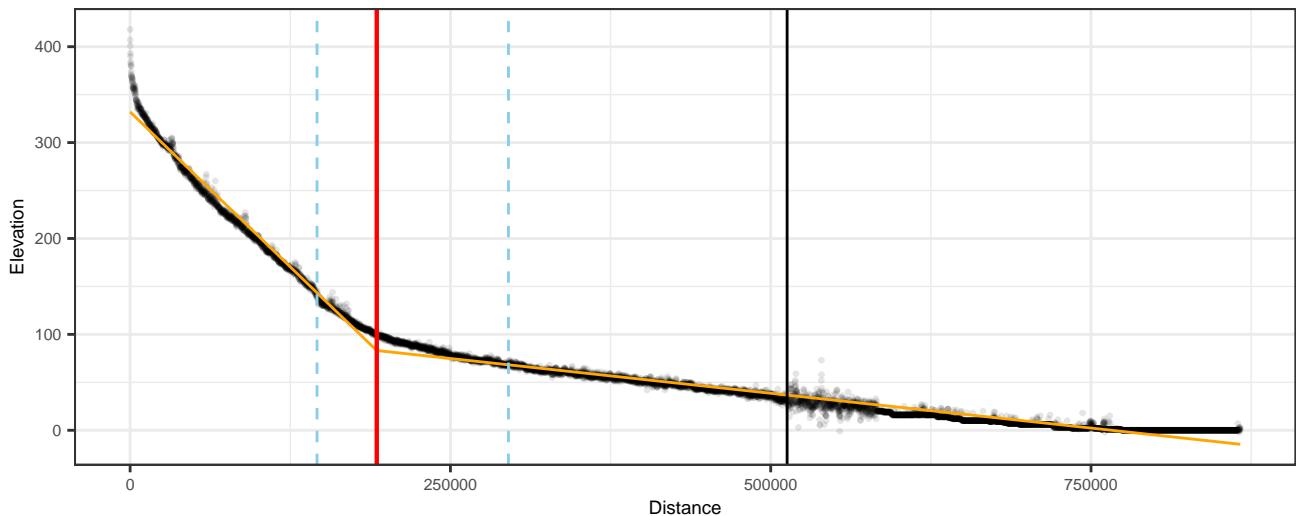

Model with two changepoints

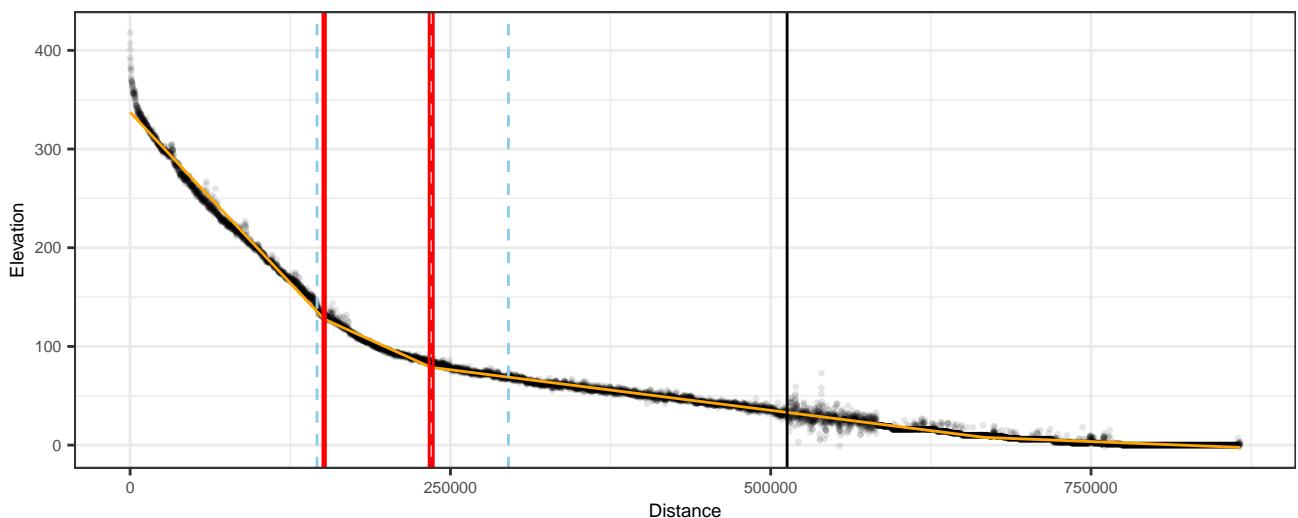

Information	Confluence	Estimated CP	Linear model

### Marne river

Model with a single change point

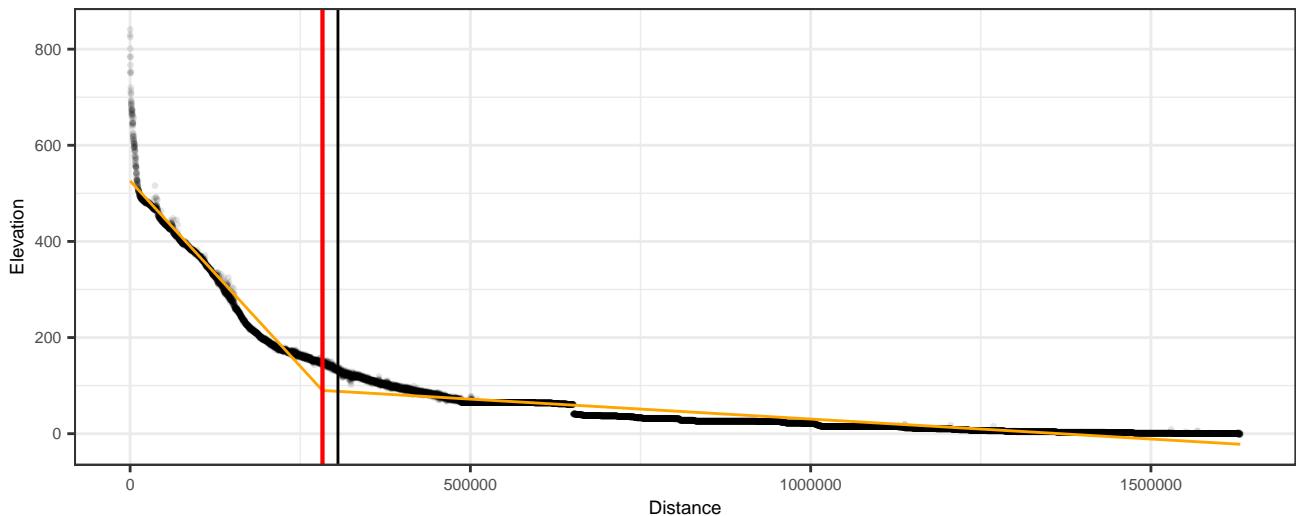

Model with two changepoints

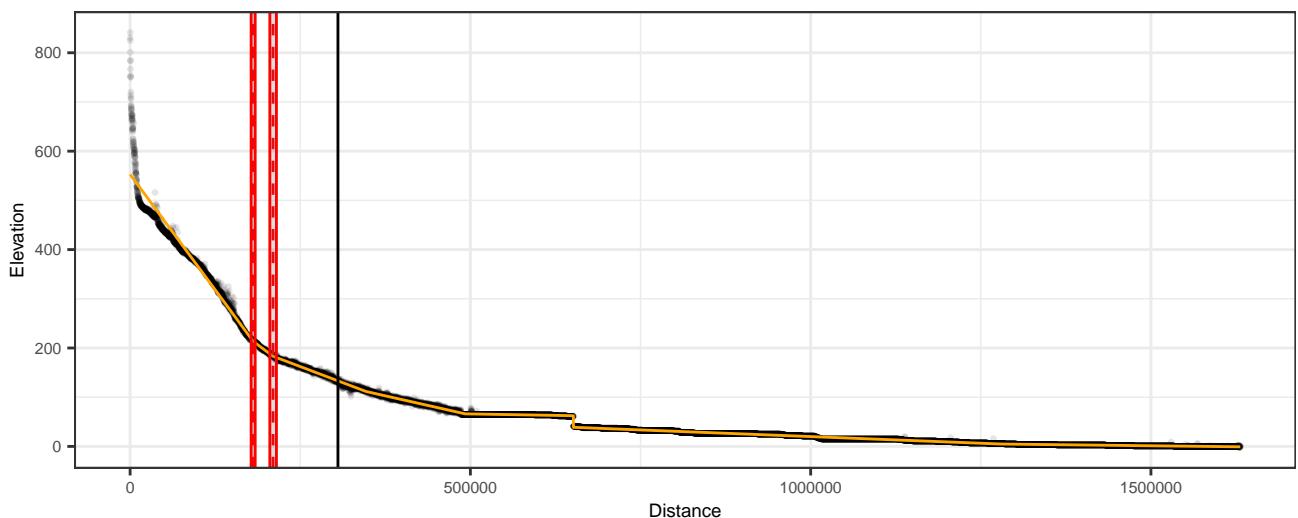

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

### Morava main river

Model with a single change point

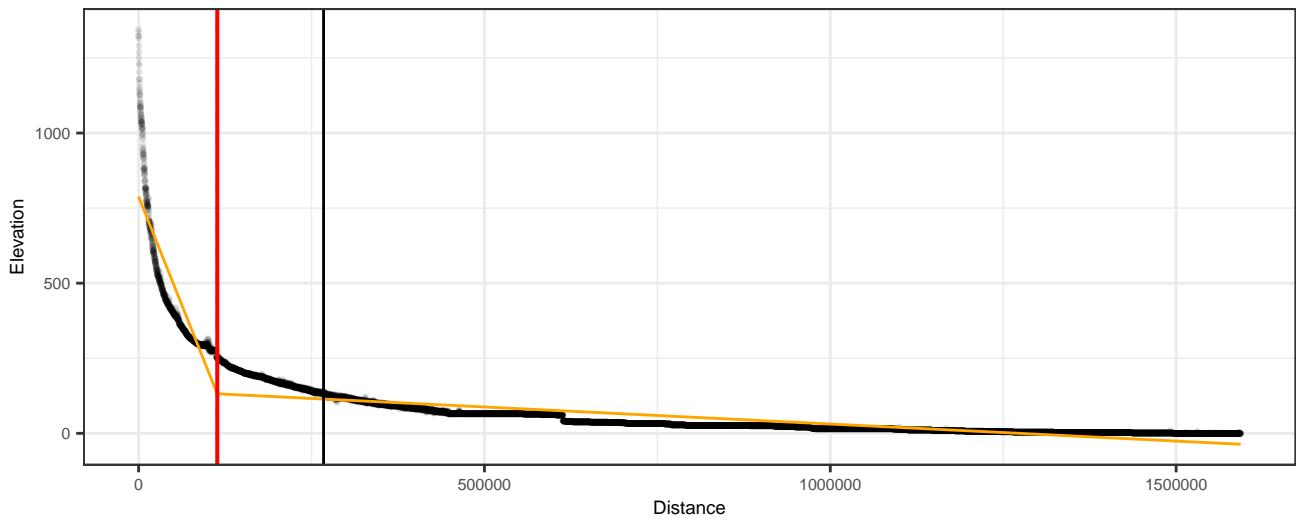

Model with two changepoints

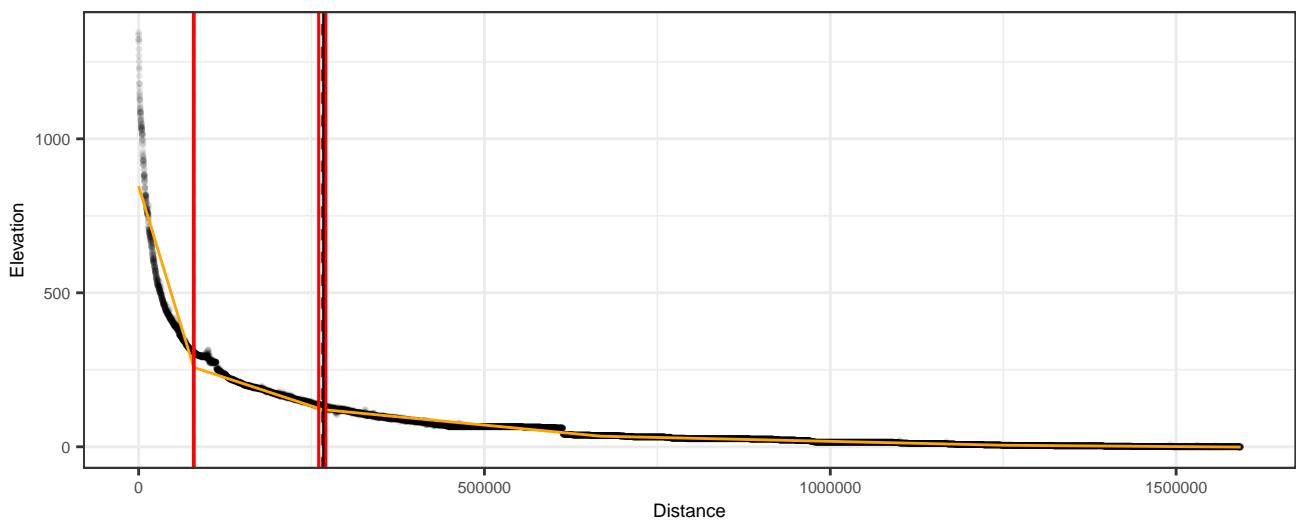

Information    +    Confluence    -    Estimated CP    |    Linear model

### Morava west river

Model with a single change point

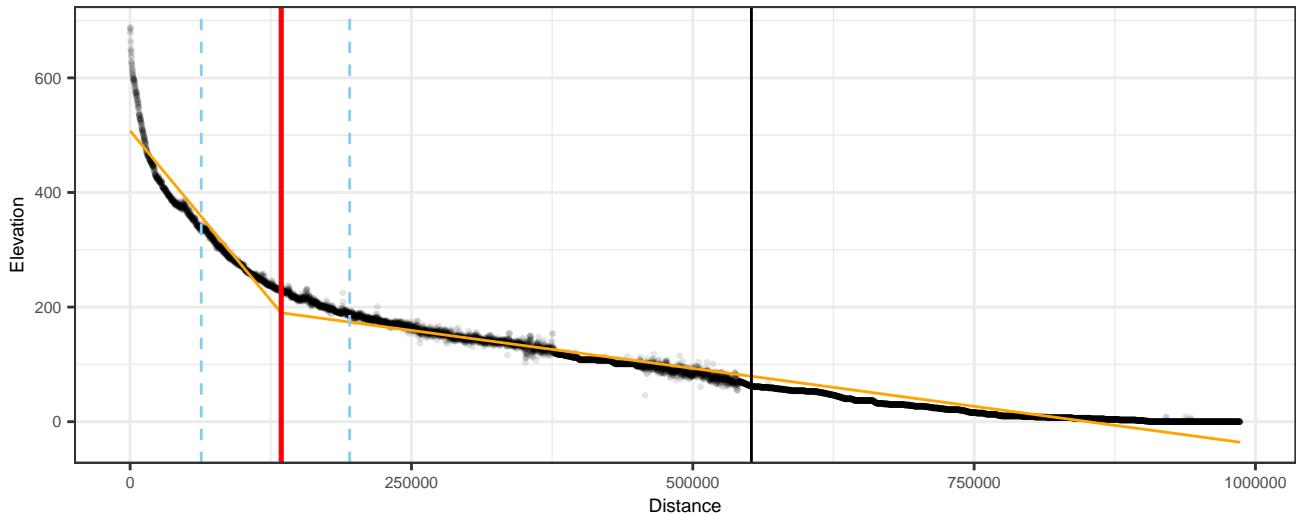

Model with two changepoints

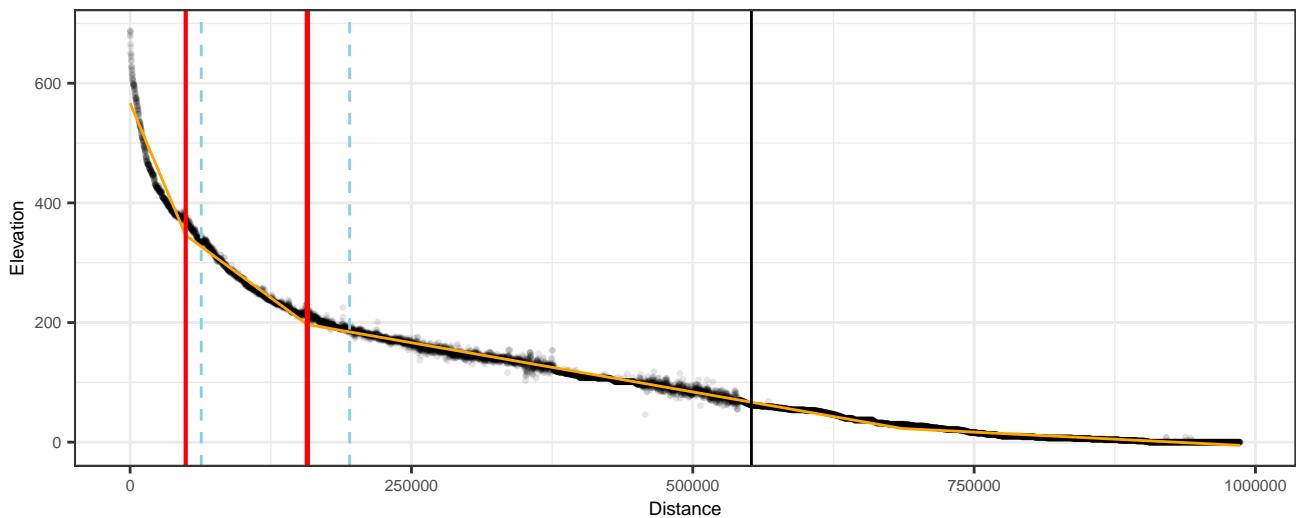

Information    +    Confluence    -    Estimated CP    |    Linear model

### Mosel river

Model with a single change point

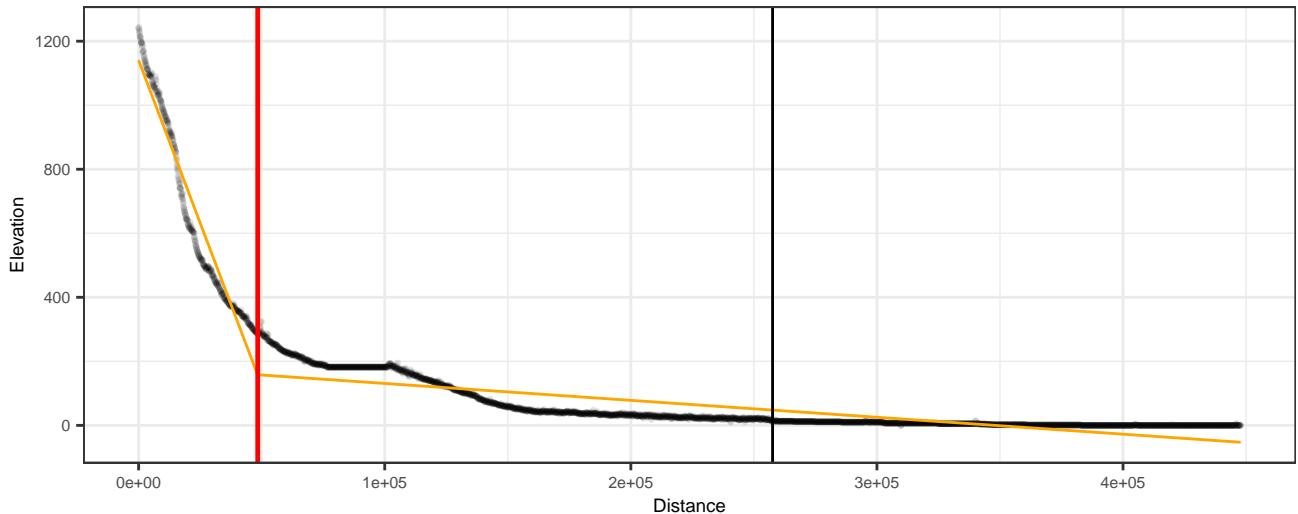

Model with two changepoints

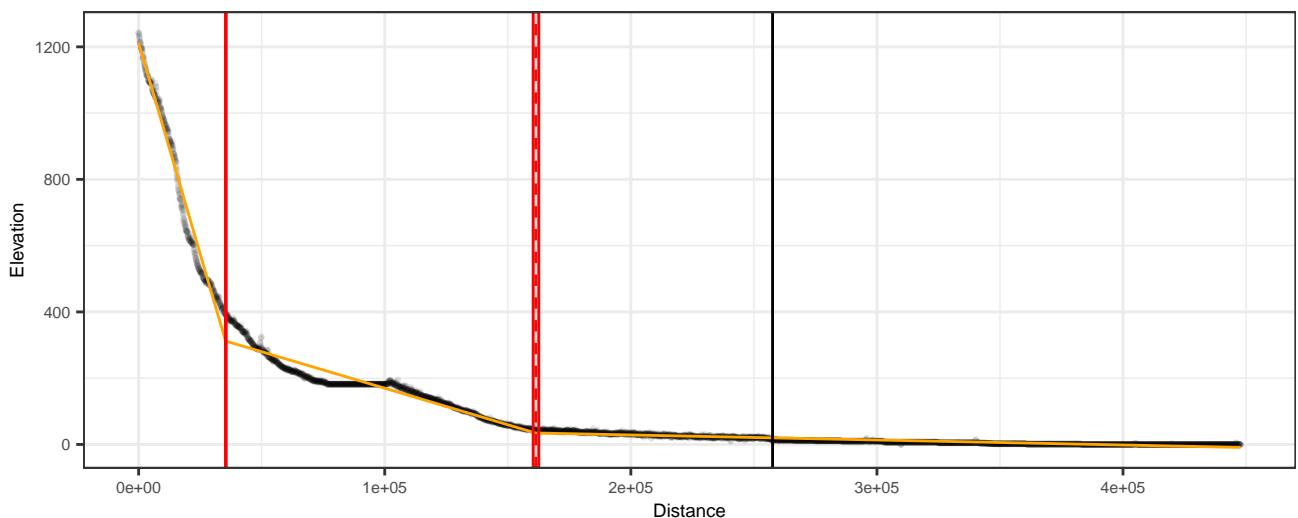

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

### Oglio river

Model with a single change point

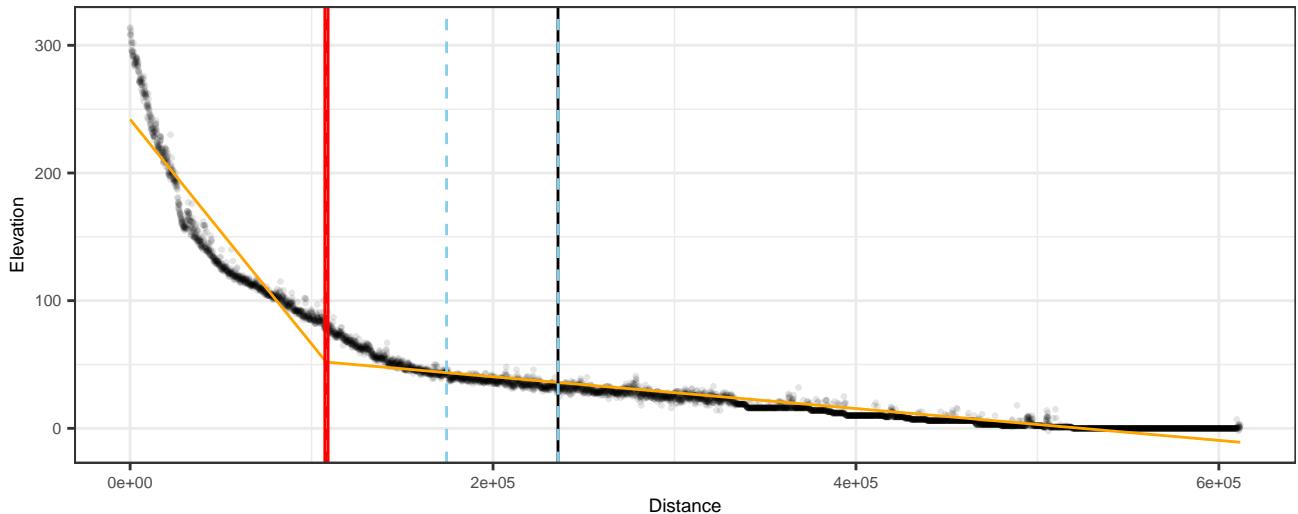

Model with two changepoints

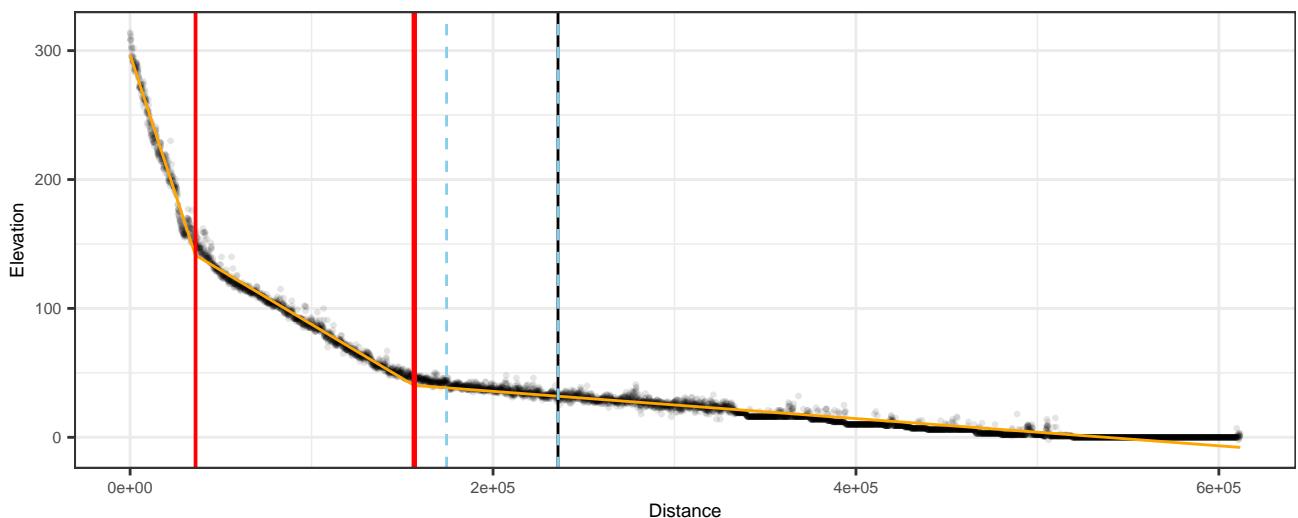

Information    + Confluence    - Estimated CP    | Linear model

### Oise river

Model with a single change point

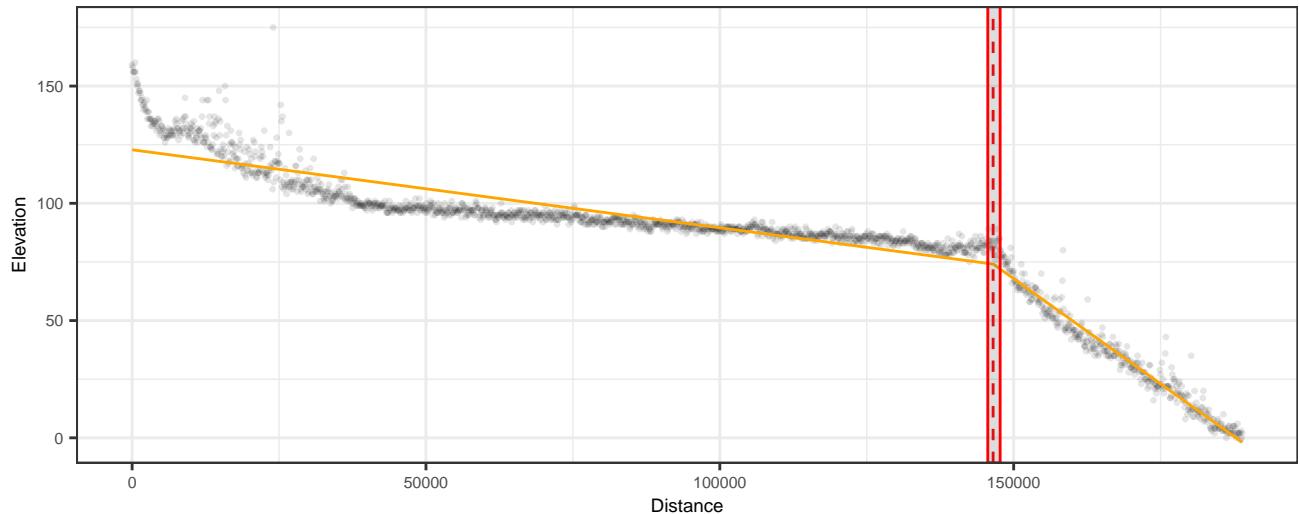

Model with two changepoints

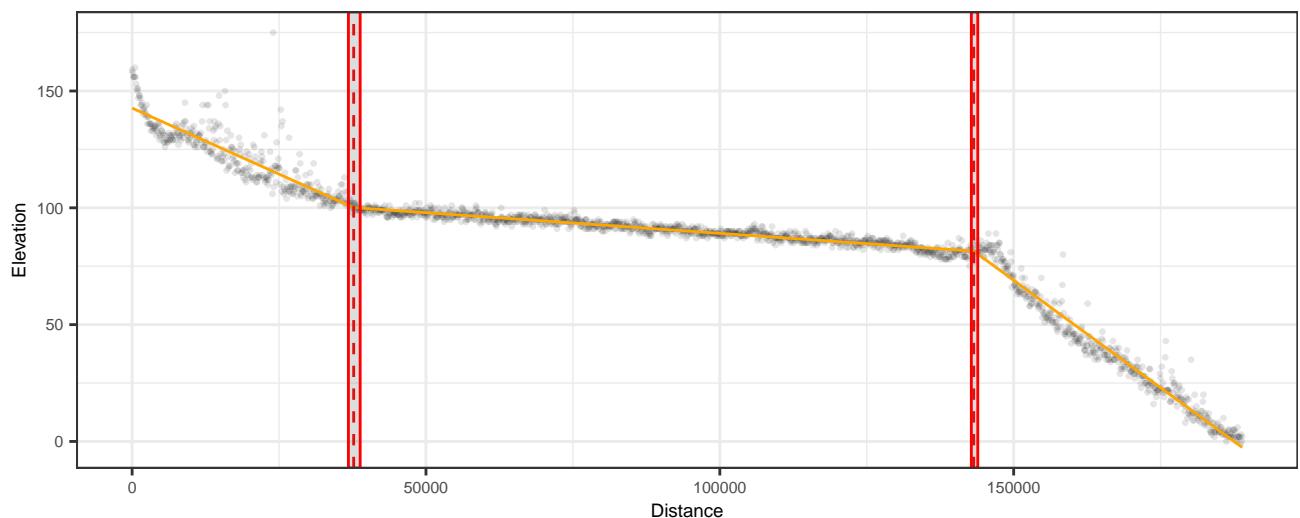

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

### Oronte river

Model with a single change point

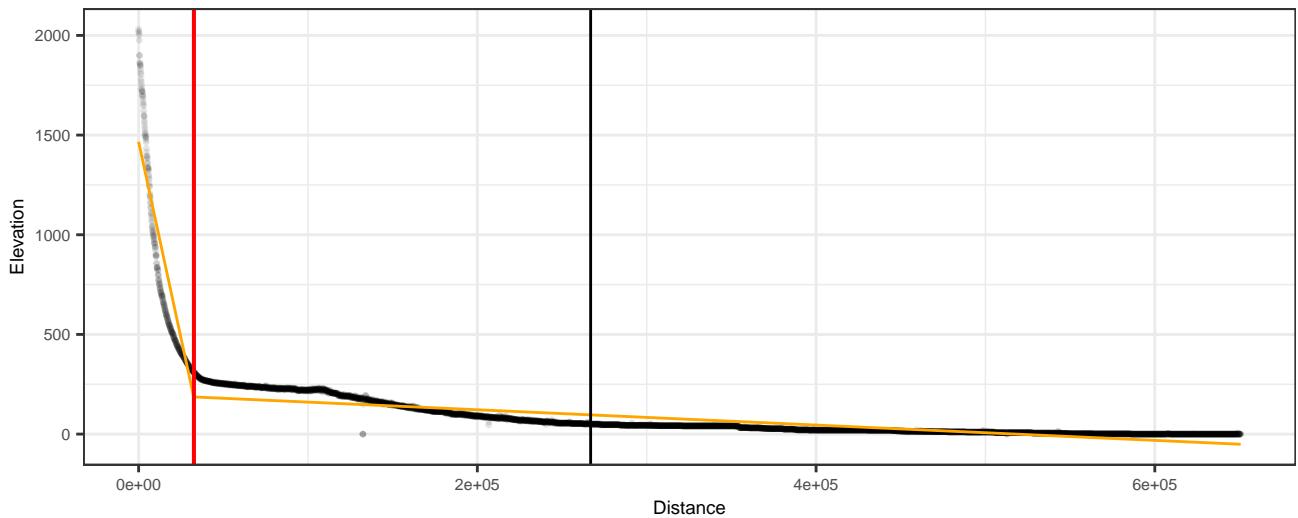

Model with two changepoints

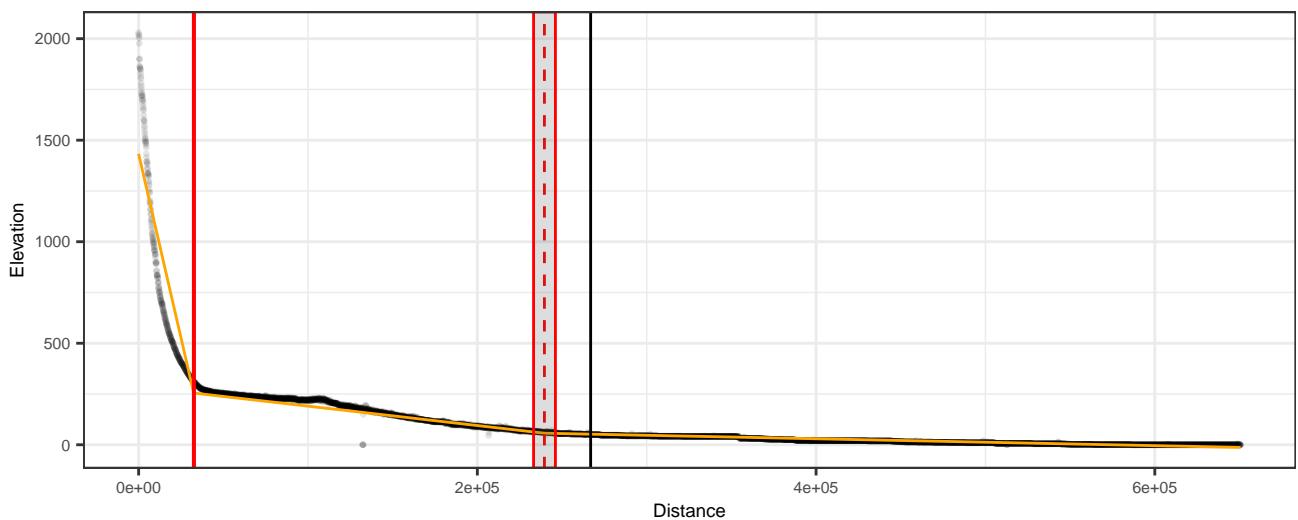

Information ————— Estimated CP ————— Linear model

### Po river

Model with a single change point

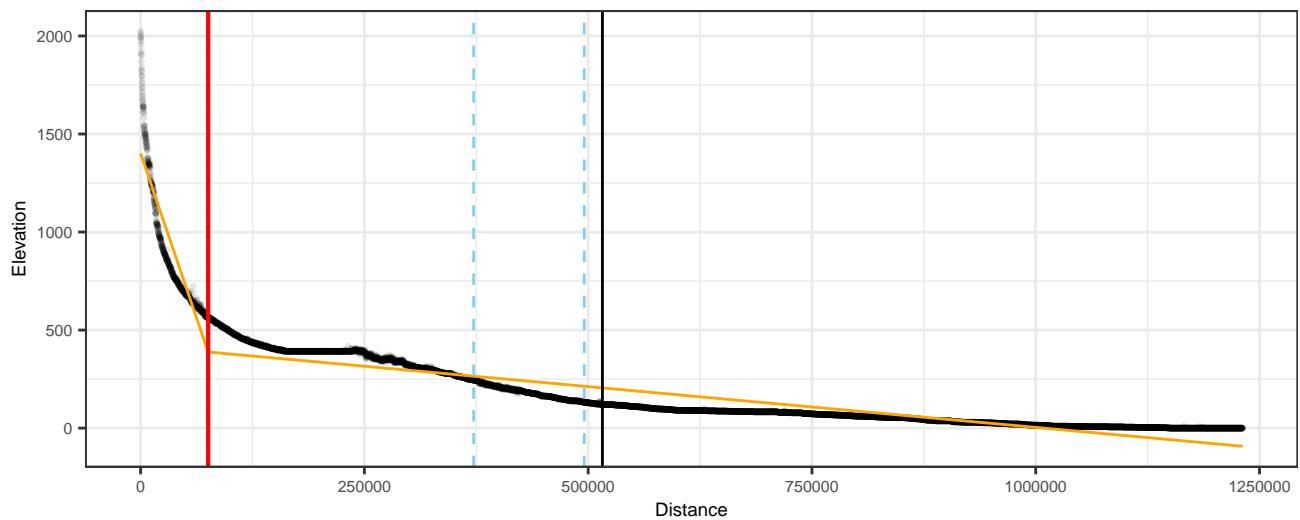

Model with two changepoints

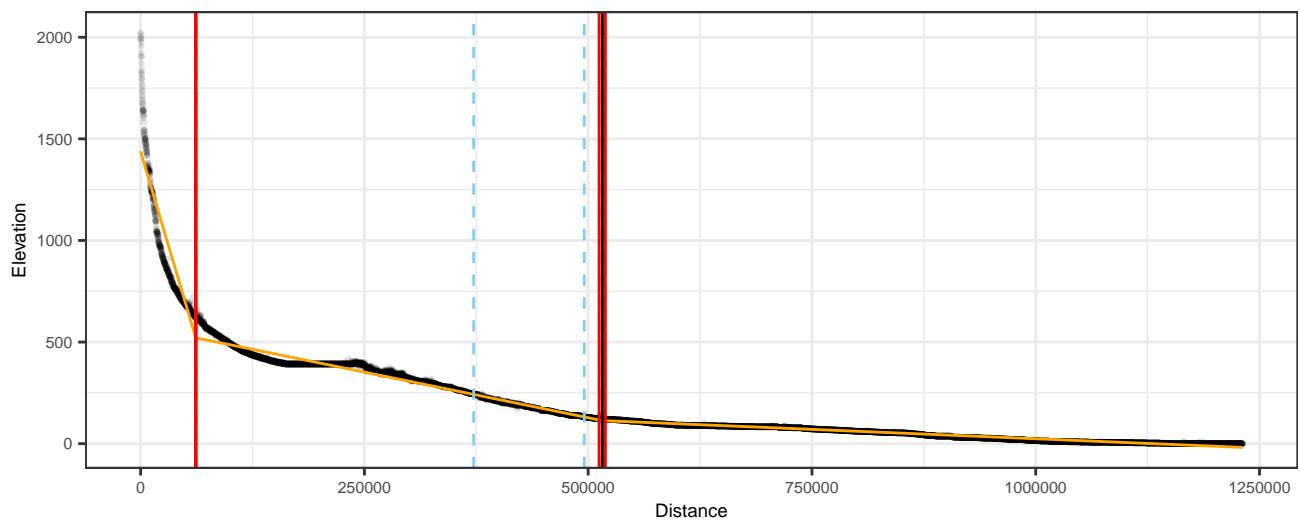

Information	+	Confluence	+	Estimated CP	+	Linear model
-------------	---	------------	---	--------------	---	--------------

### Rhine river

Model with a single change point

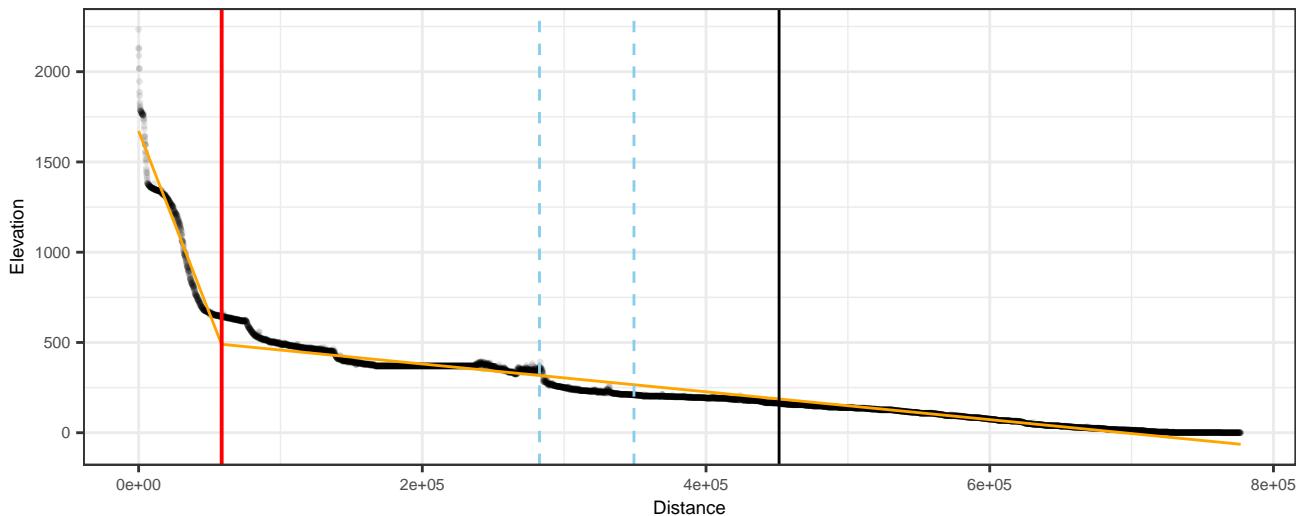

Model with two changepoints

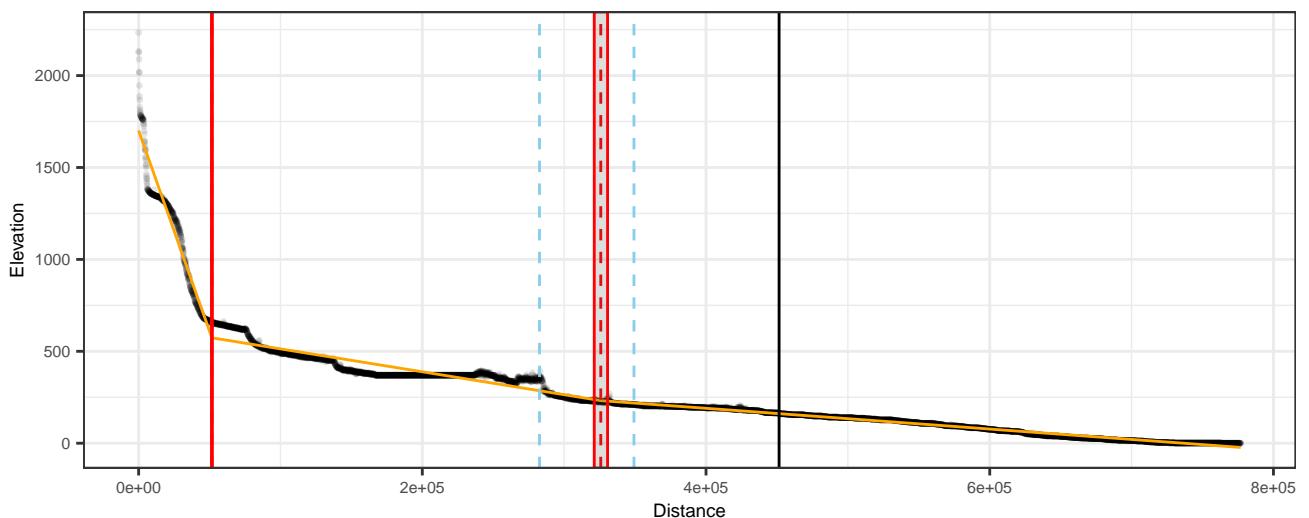

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

## Rhône river

Model with a single change point

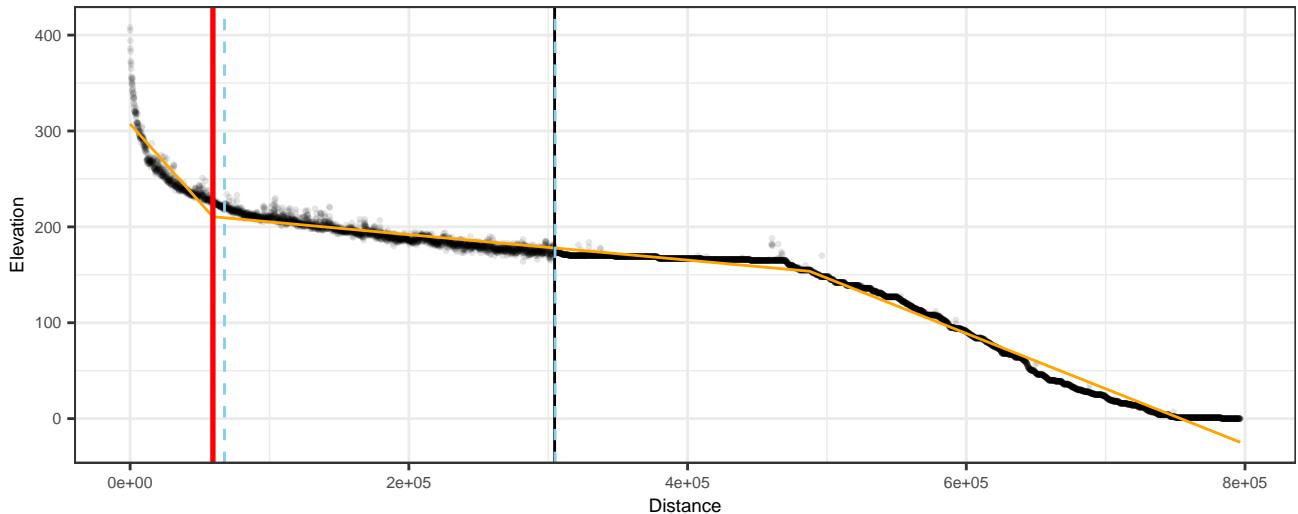

Model with two changepoints

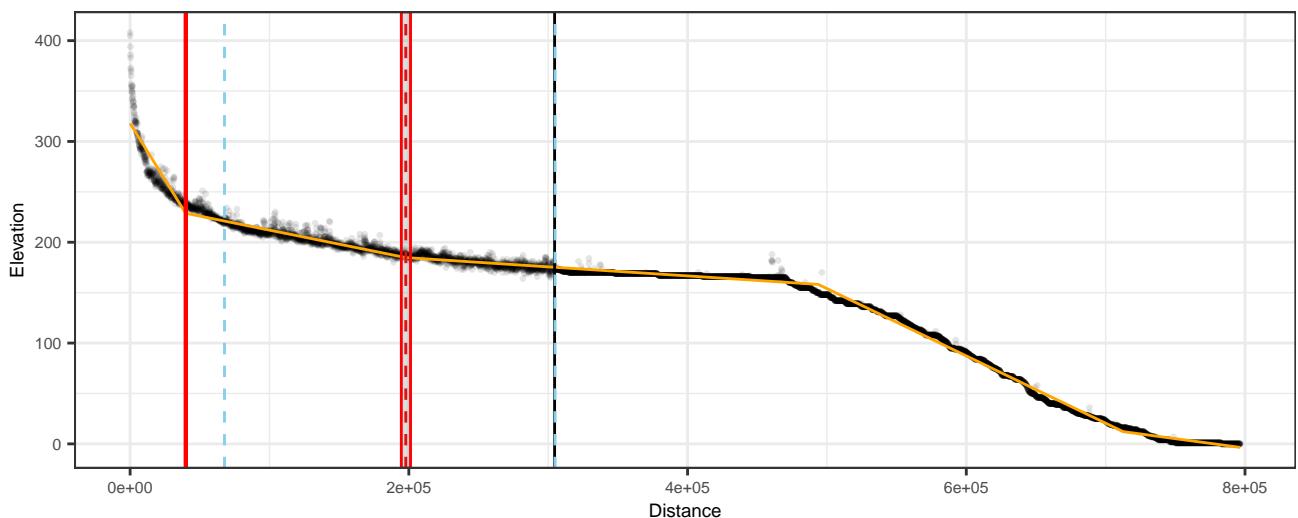

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

## Saône river

Model with a single change point

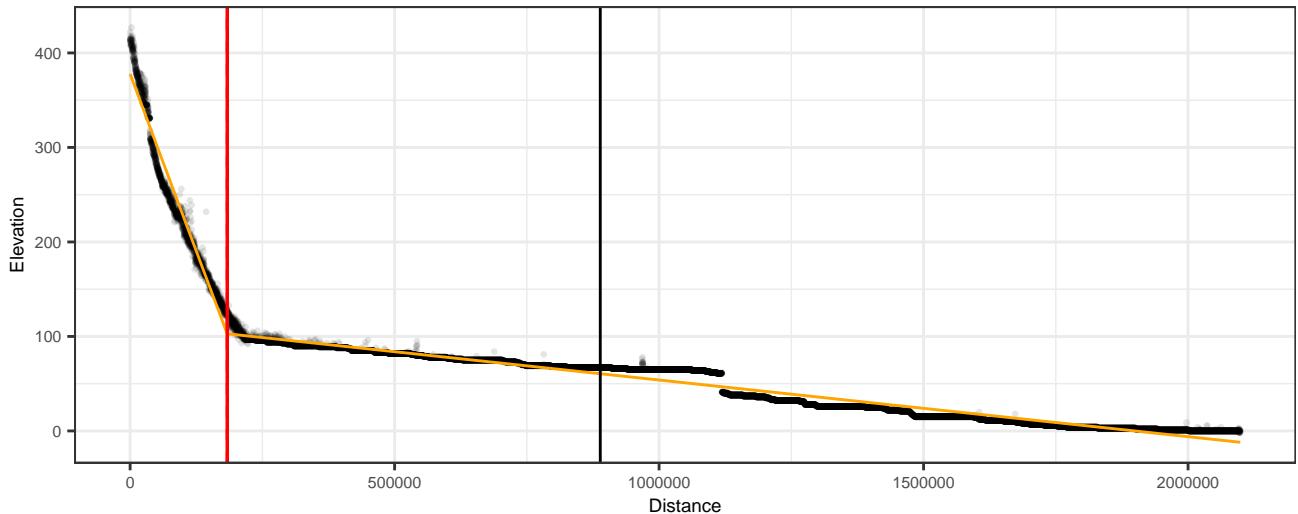

Model with two changepoints

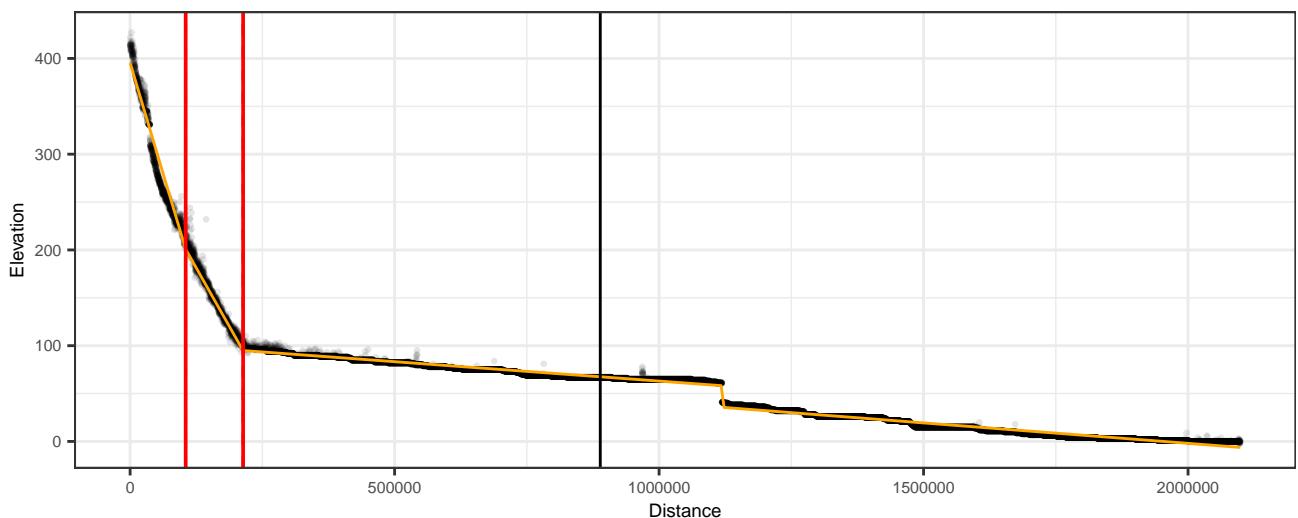

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

### Sava river

Model with a single change point

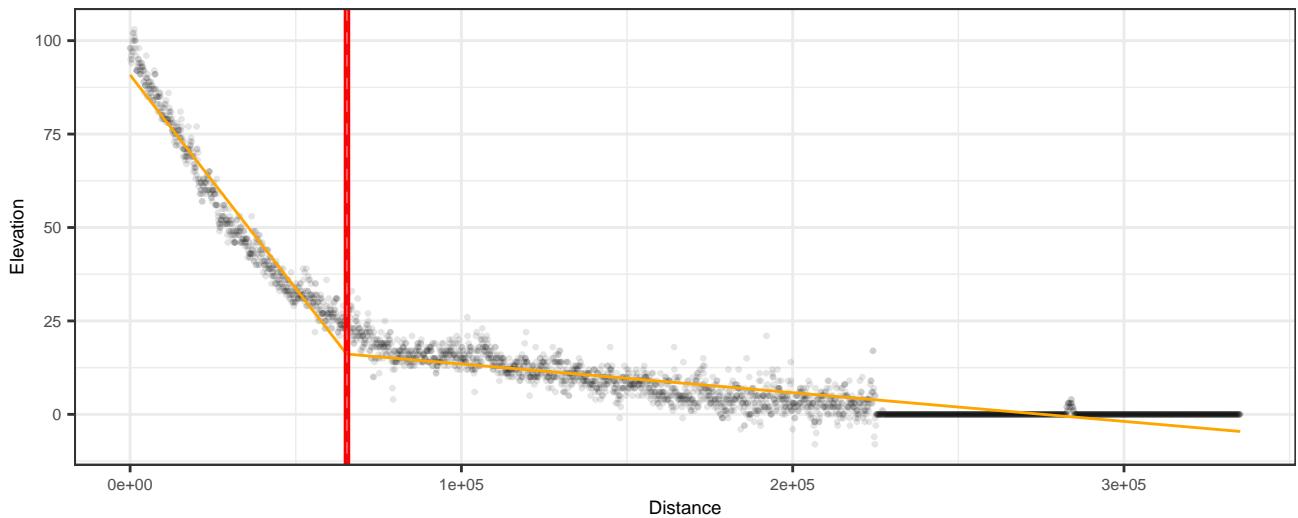

Model with two changepoints

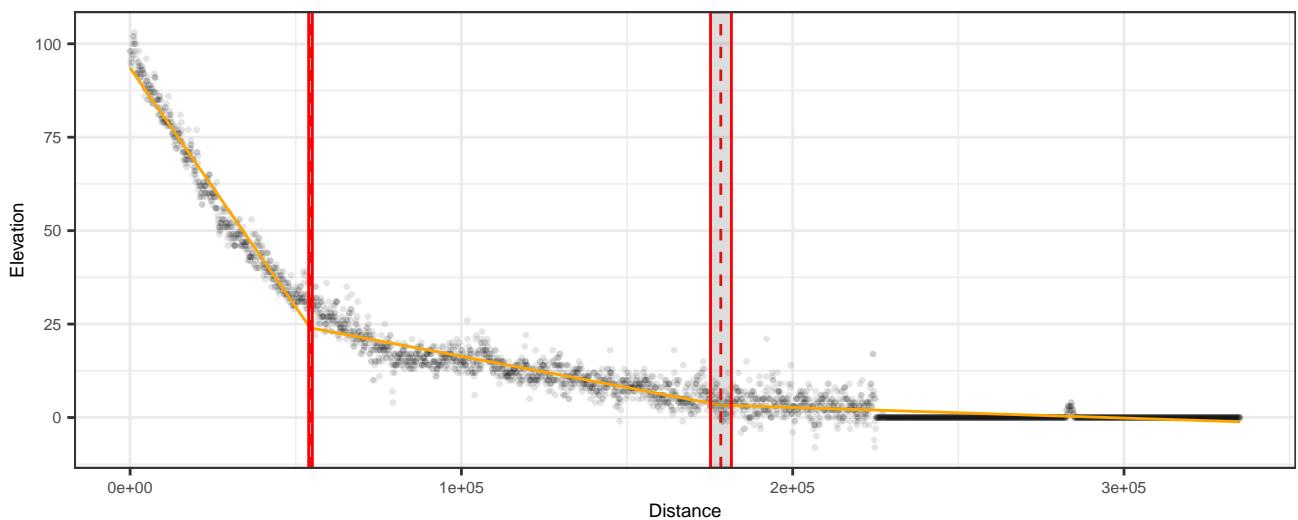

Information    +    Confluence    -    Estimated CP    —    Linear model

### Schelde river

Model with a single change point

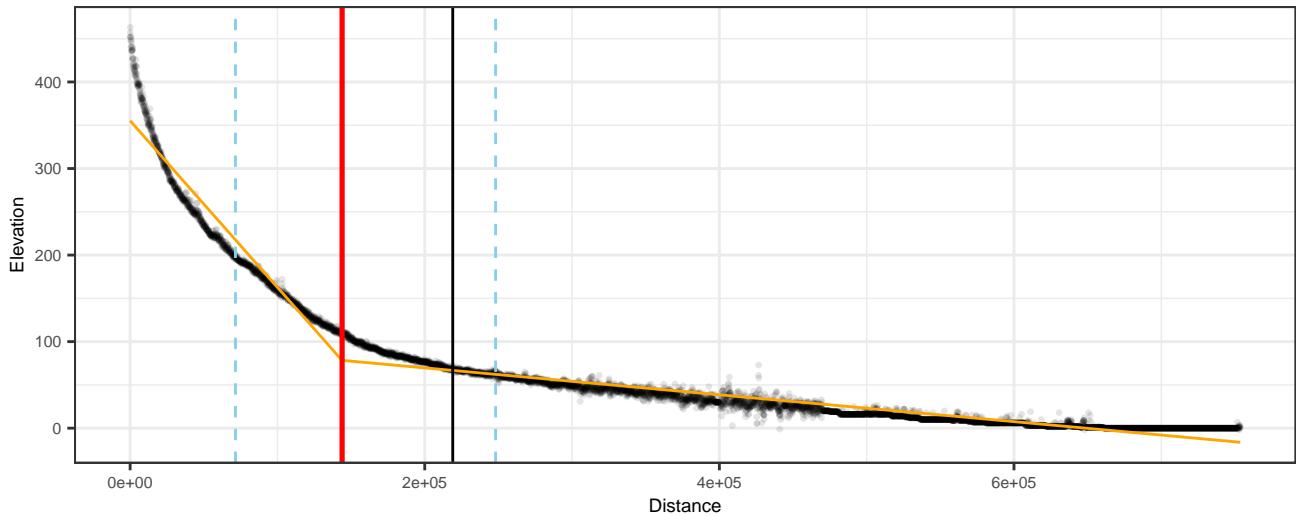

Model with two changepoints

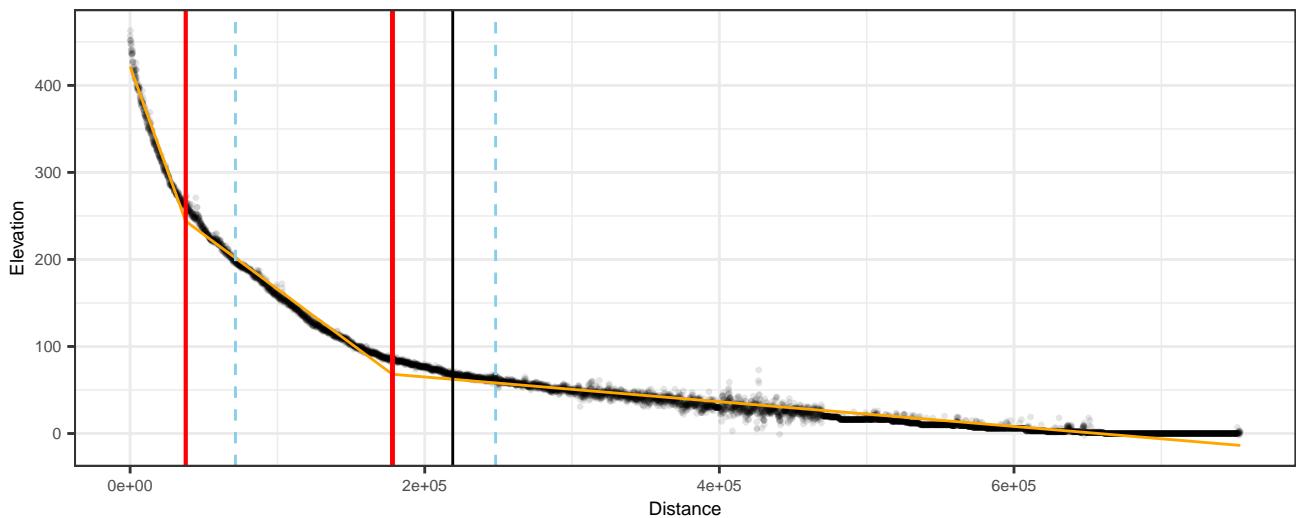

Information — Estimated CP — Linear model

### Seine river

Model with a single change point

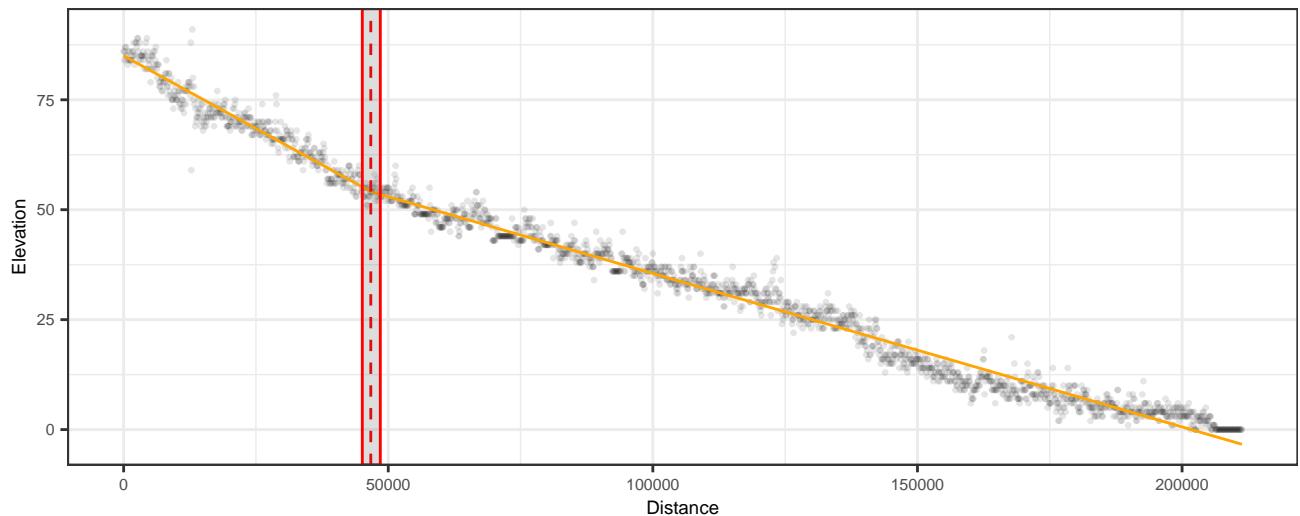

Model with two changepoints

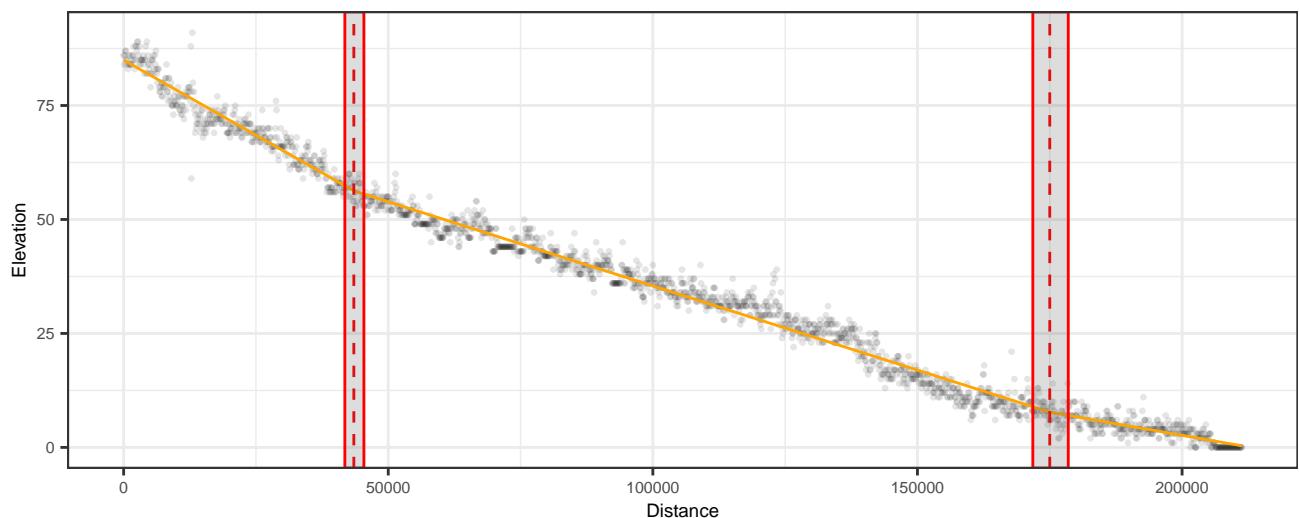

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------

### Somme river

Model with a single change point

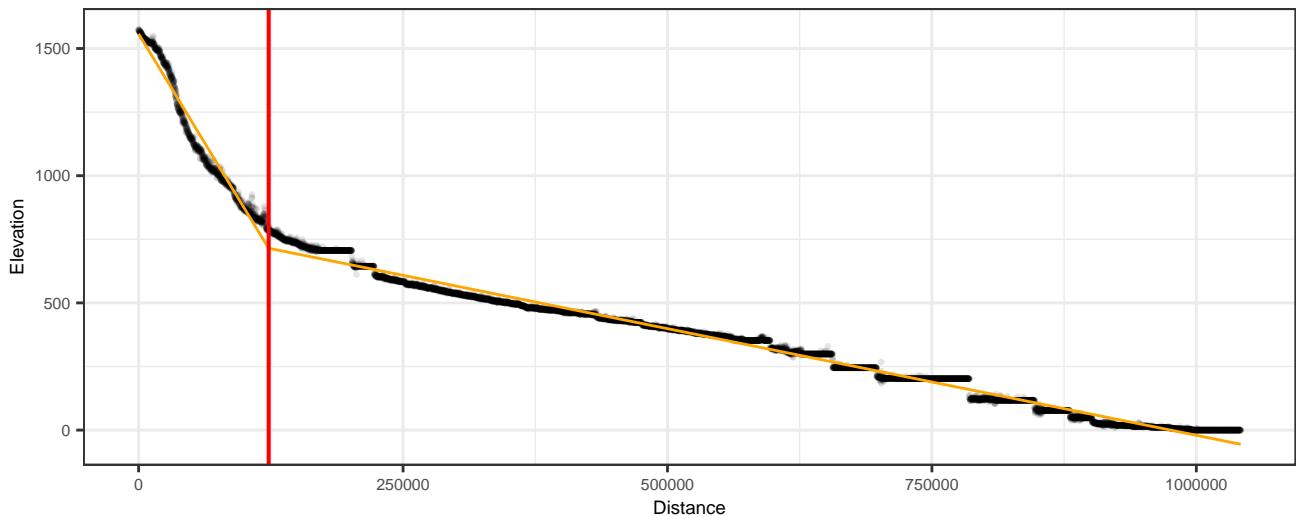

Model with two changepoints

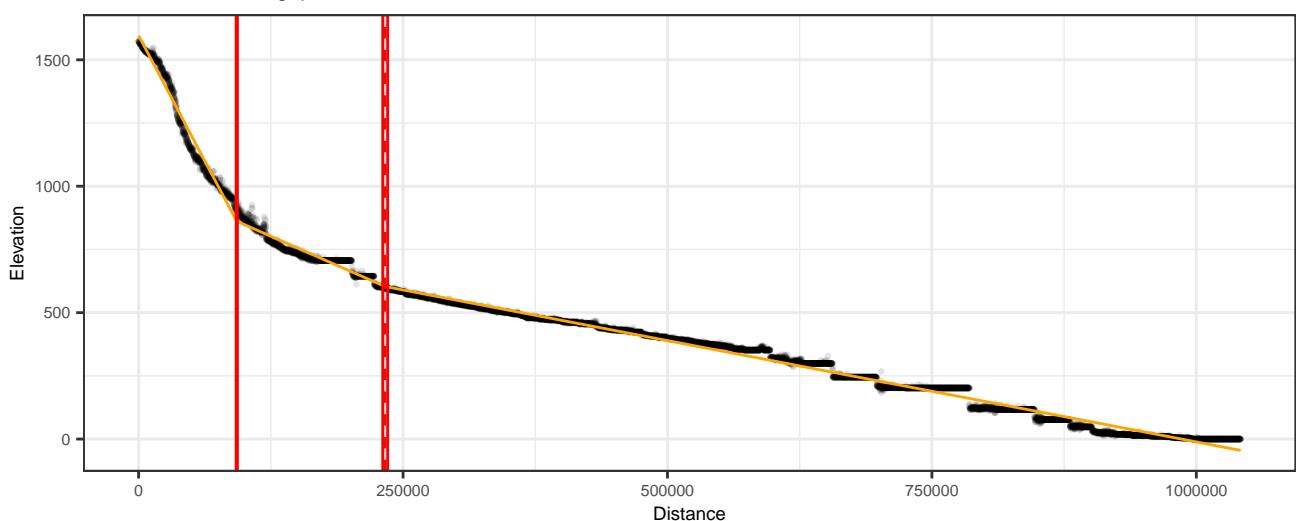

Information    — Estimated CP    — Linear model

Tajo river

Model with a single change point

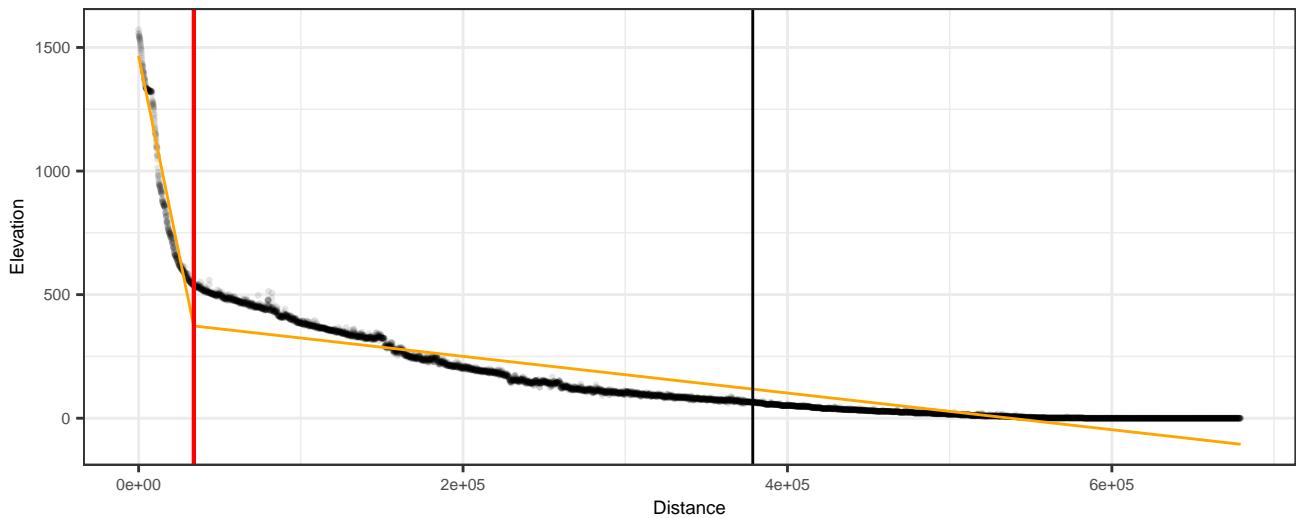

Model with two changepoints

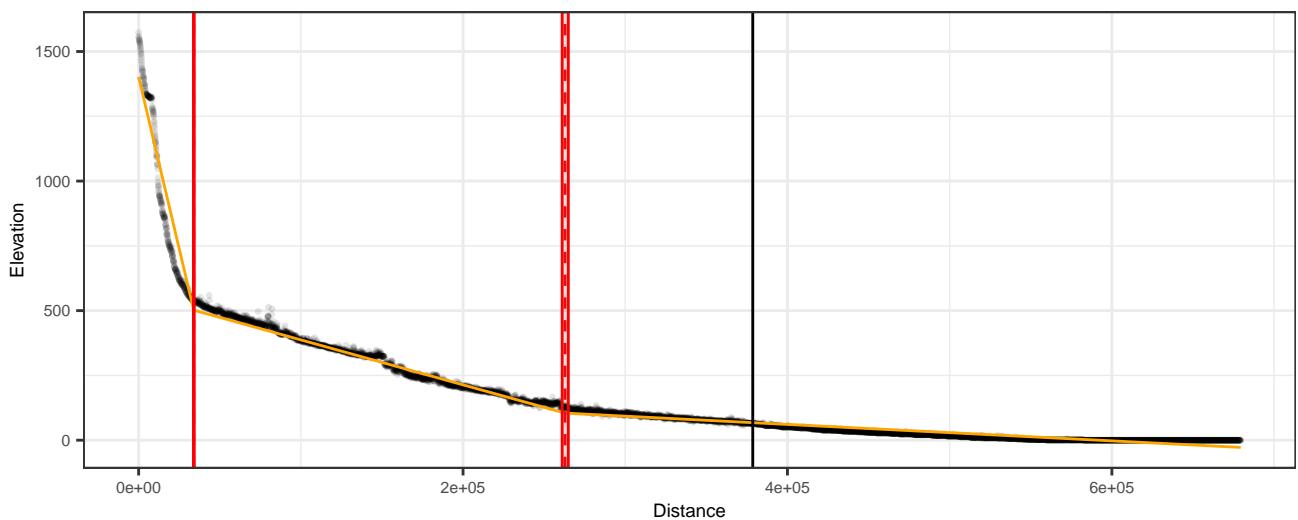

Information — Estimated CP — Linear model

### Tarn river

Model with a single change point

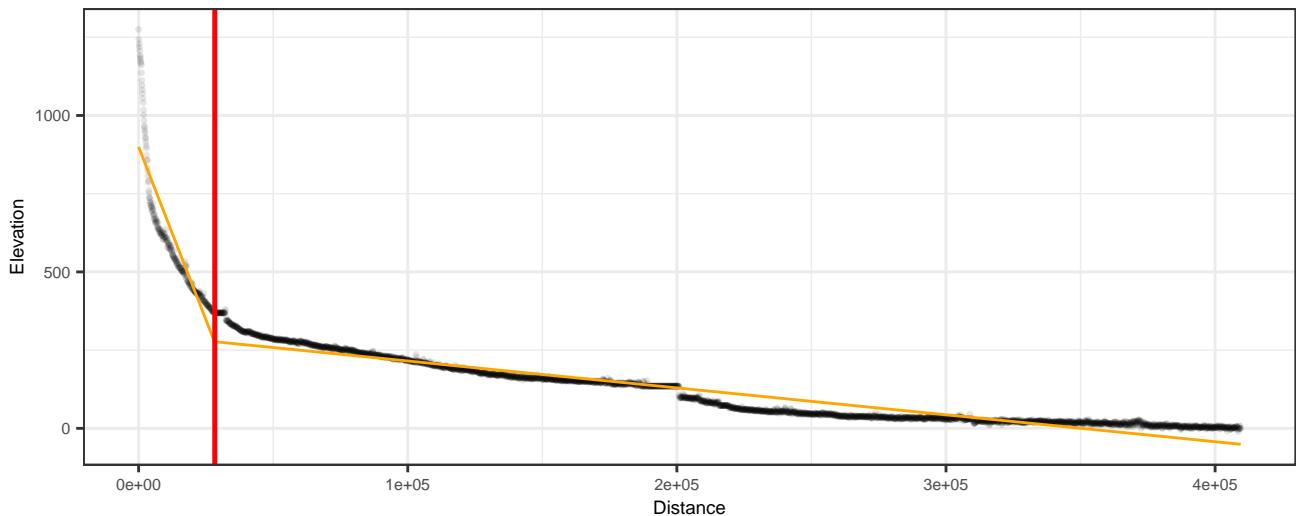

Model with two changepoints

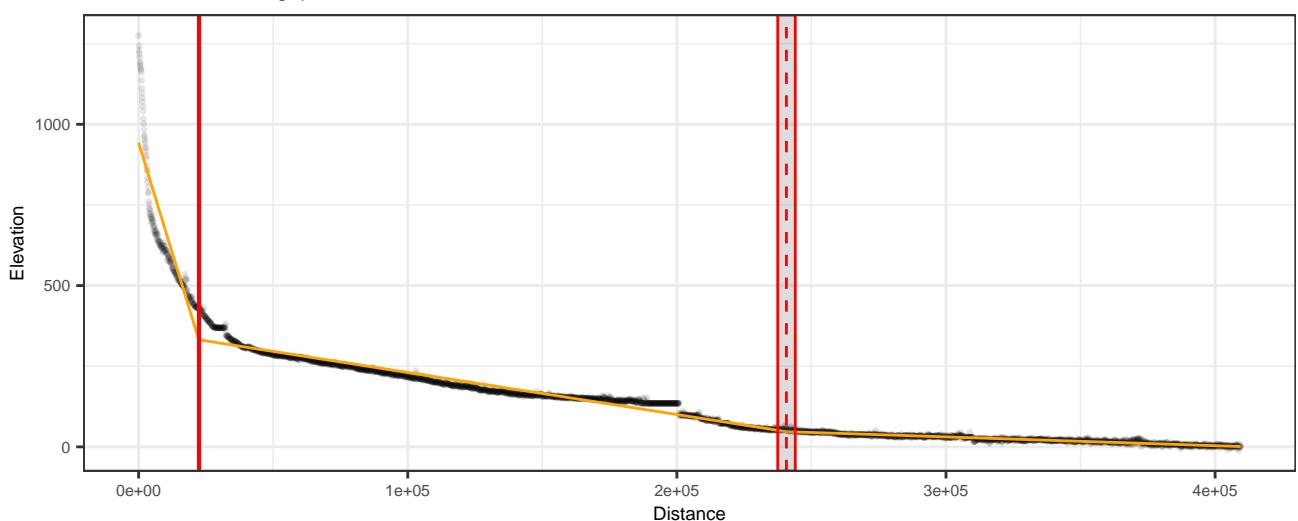

Information    +    Confluence    -    Estimated CP    |    Linear model

### Tevere river

Model with a single change point

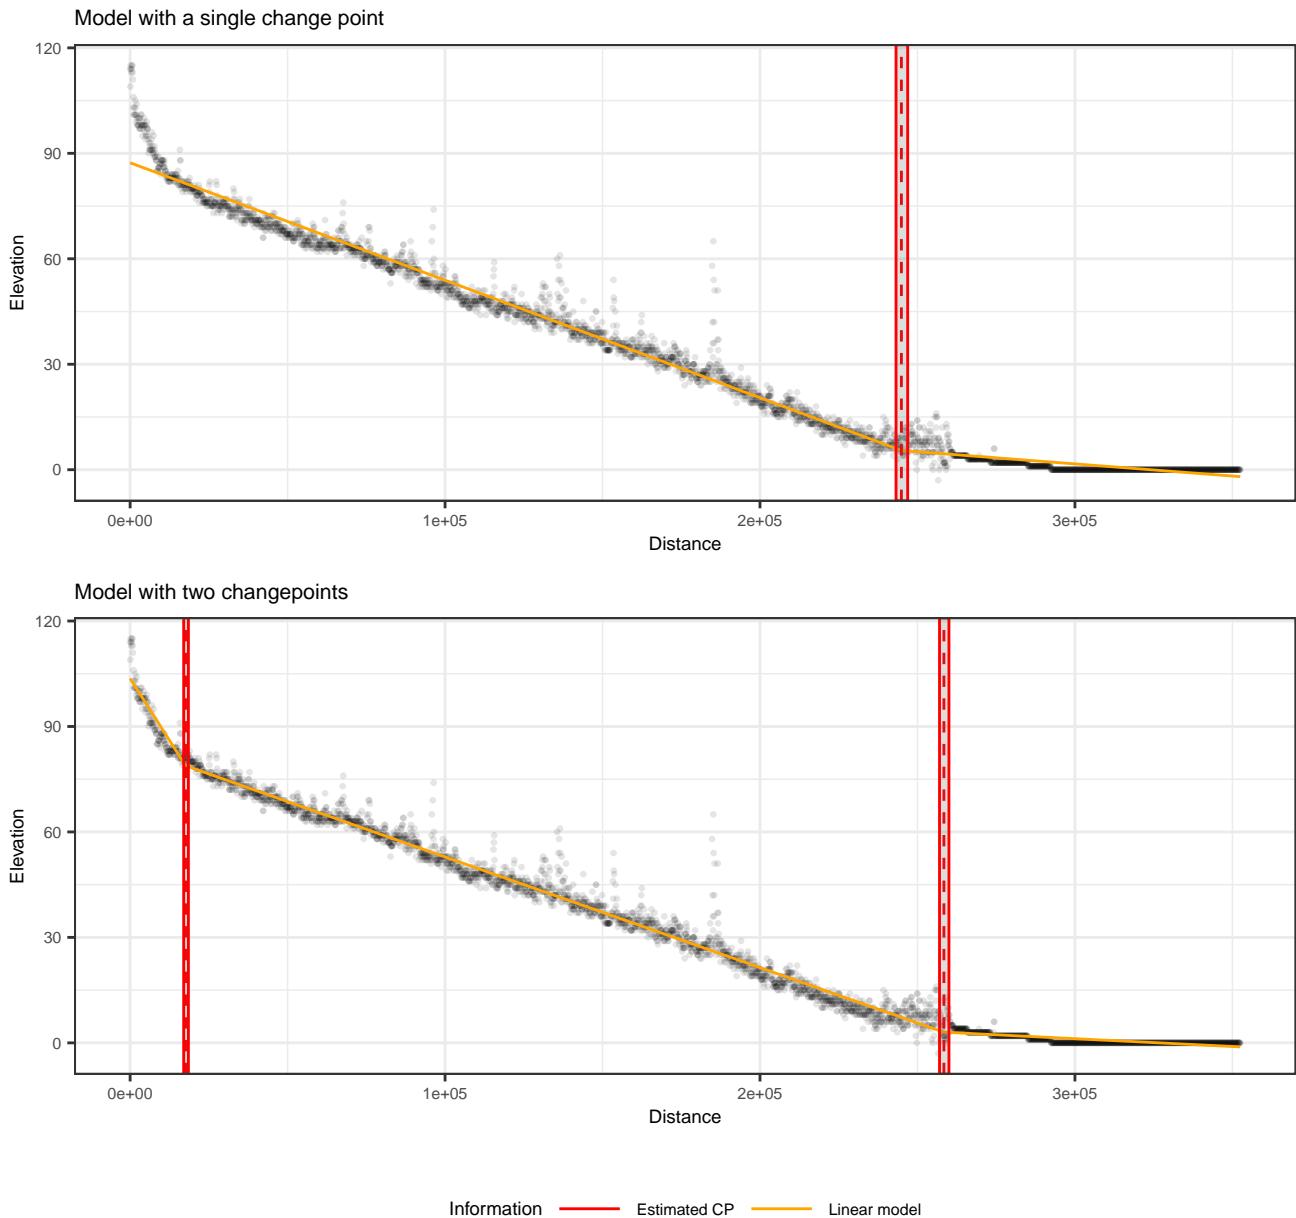

Model with two changepoints

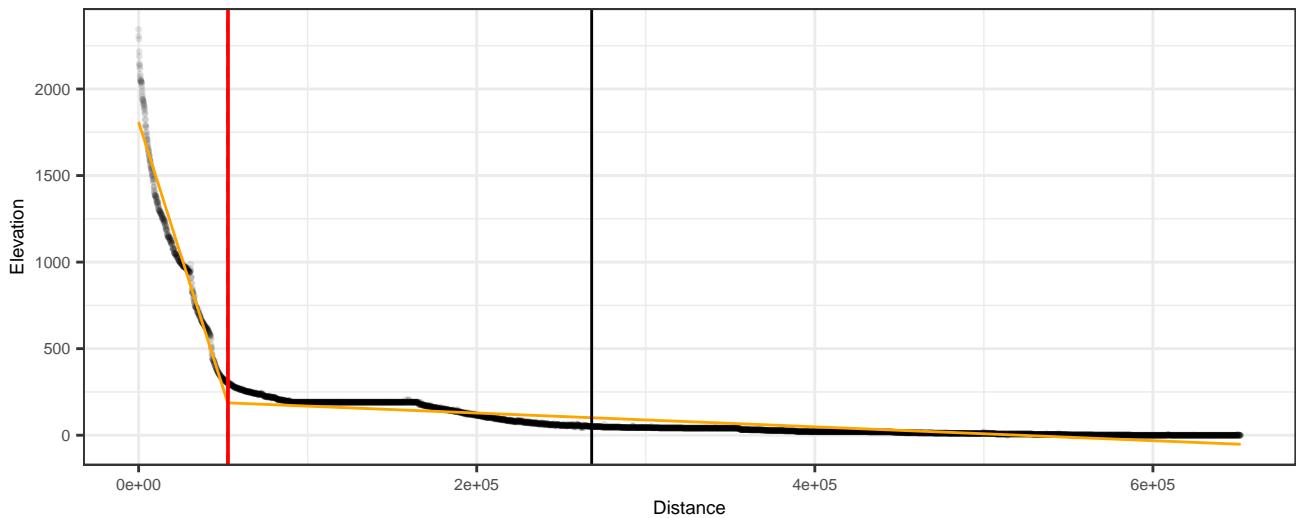

Information — Estimated CP — Linear model

### Thames river

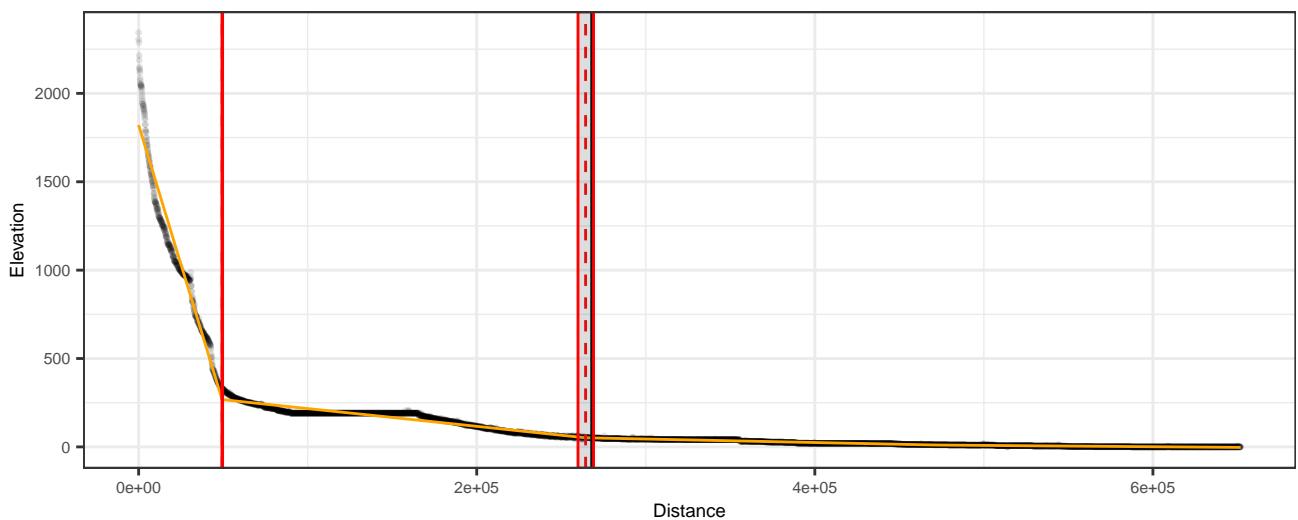

### Ticino river

Model with a single change point

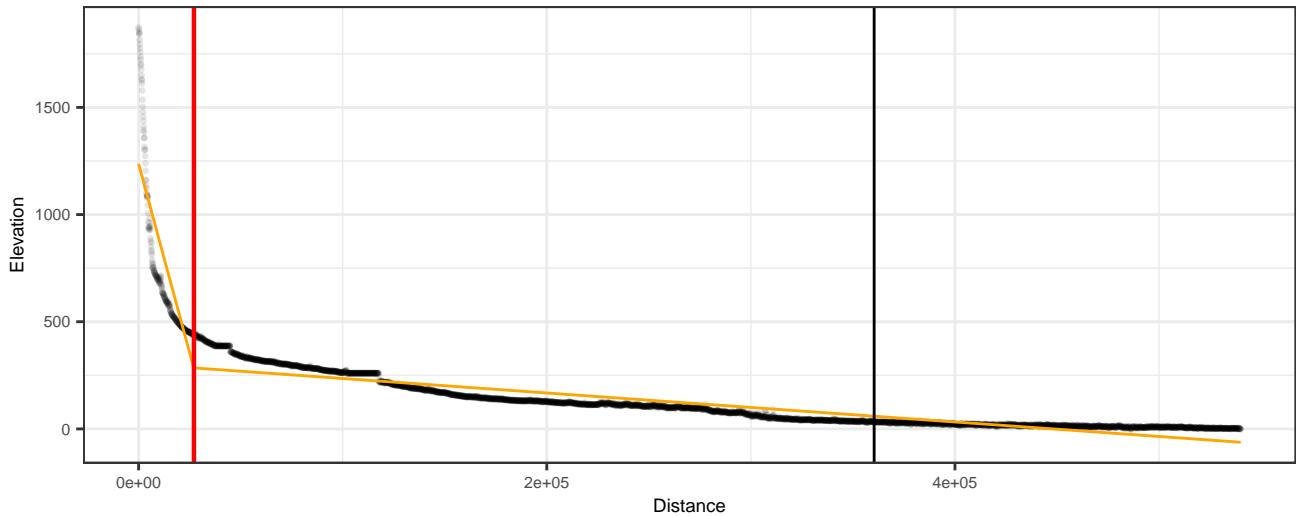

Model with two changepoints

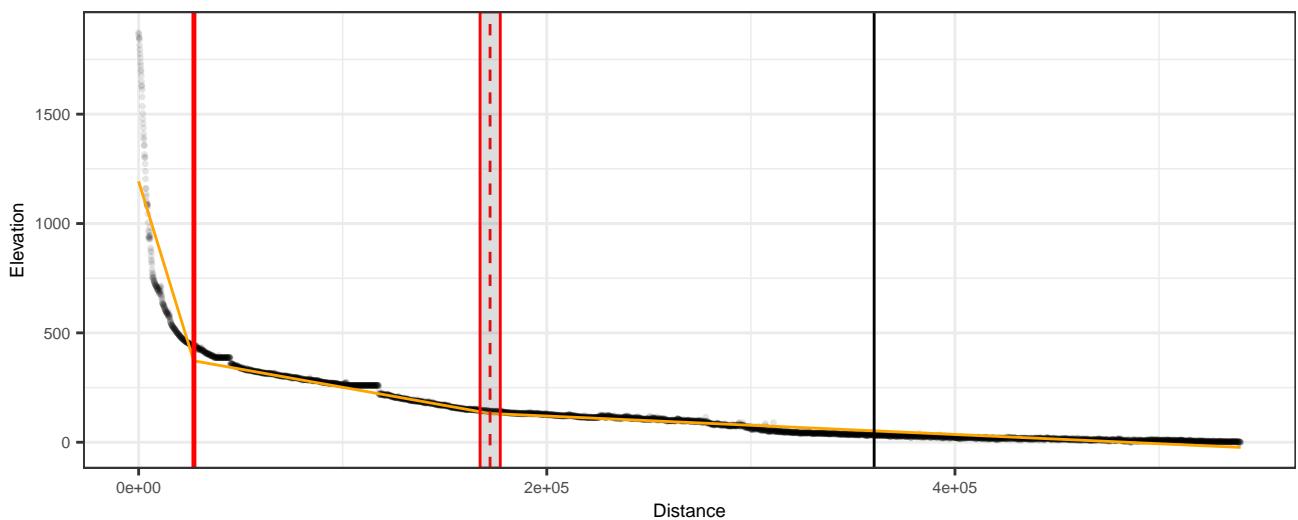

Information    + Confluence    - Estimated CP    | Linear model

### Tundzha river

Model with a single change point

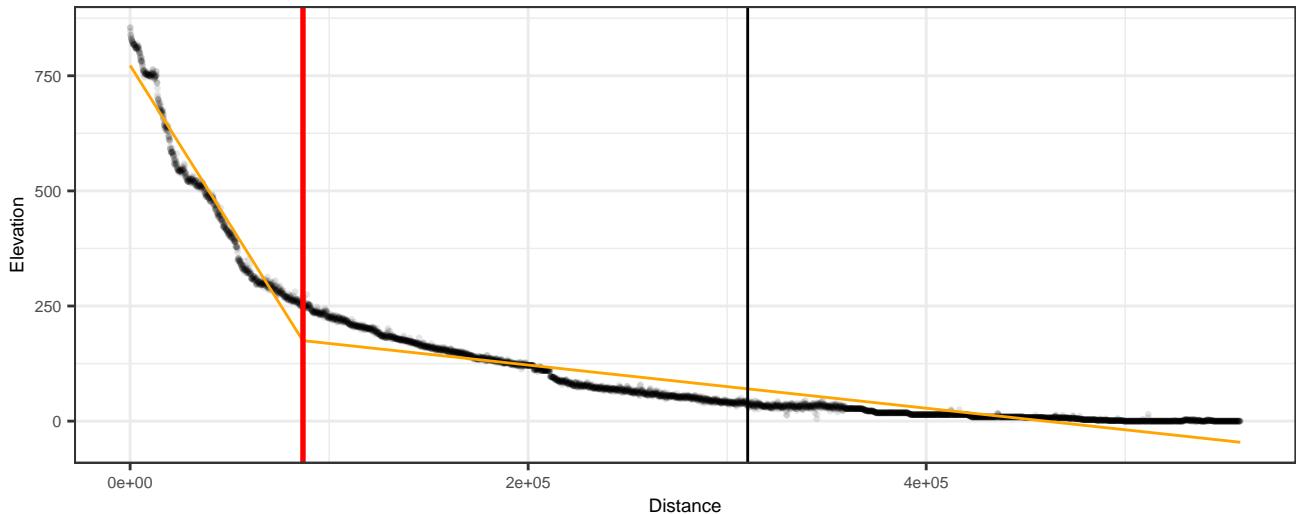

Model with two changepoints

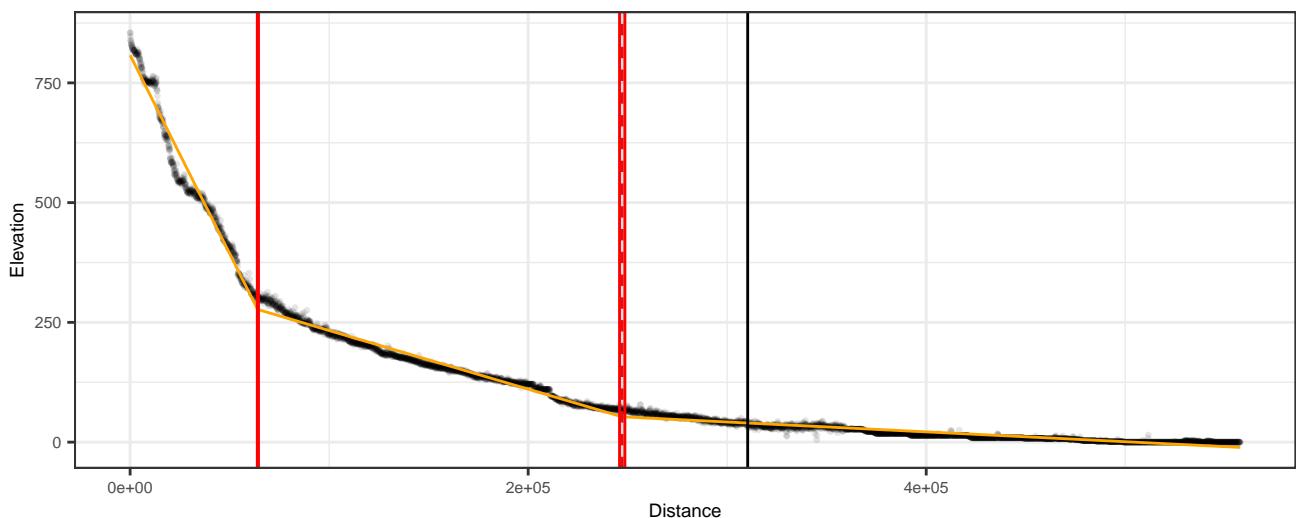

Information		Confluence		Estimated CP		Linear model
-------------	--	------------	--	--------------	--	--------------

### Vienne river

Model with a single change point

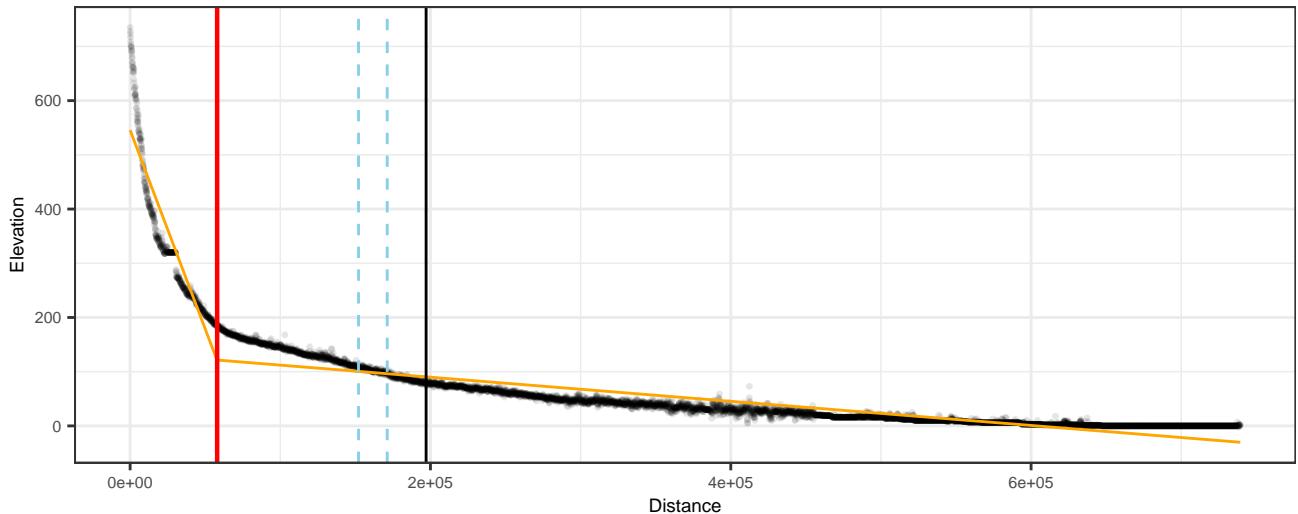

Model with two changepoints

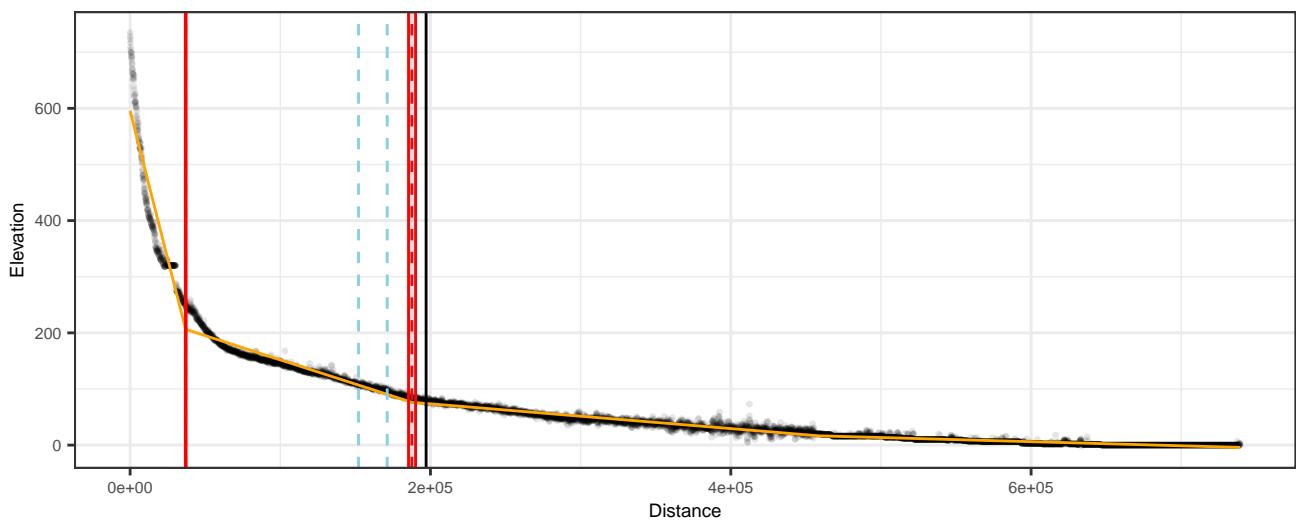

Information    +    Confluence    -    Estimated CP    —    Linear model

### Yonne river

Model with a single change point

Model with two changepoints

Information		Empirical CP		Confluence		Estimated CP		Linear model
-------------	--	--------------	--	------------	--	--------------	--	--------------
